

AUDIT REPORT

DALLAS COUNTY

Year End Inventory - Foreign Travel Vaccine - FY2022

Darryl D. Thomas
Dallas County Auditor

ISSUED: 10/7/2022

RELEASED: NOVEMBER 21, 2022

Year End Inventory - Foreign Travel Vaccine - FY2022

TABLE OF CONTENTS

MANAGEMENT LETTER	3
EXECUTIVE SUMMARY.....	4
INTRODUCTION	5
DETAILS	6

This report is intended for the information and use of the agency/department. While we have reviewed internal controls and financial reports, this review will not necessarily disclose all matters of a material weakness. It is the responsibility of the department to establish and maintain effective internal control over compliance with the requirements of laws, regulations, and contracts applicable to the department

DALLAS COUNTY
COUNTY AUDITOR

MANAGEMENT LETTER

Dr. Philip Huang
HHS Director
Dallas, Texas

Attached is the County Auditor's final report entitled "Year End Inventory - Foreign Travel Vaccine - FY2022" Report. In order to reduce paper usage, a hard copy will not be sent through in house mail except to the auditee.

In you prefer that released reports be emailed to a different (or additional) recipient, please inform me of the name and the change will be made.

Respectfully,

Darryl D. Thomas

Darryl D. Thomas
County Auditor

EXECUTIVE SUMMARY

Health and Human Services (HHS) - International Travel has the principal areas of responsibility to provide Dallas County citizens with lower cost alternatives to vaccinations required by schools and other governmental agencies. The department is a part of the Preventative Health unit and consists of one nursing supervisor, four clerks, a cashier, and two nurses. The International Travel Office is located in the Dallas County Health and Human Services building located at 2377 North Stemmons Freeway, Dallas, Texas.

Summary of Significant Observations

- None identified

Repeat Observations from Previous Audits:

- Five vaccines overstated by \$1,803.33 and one vaccine understated by \$108.24 compared to a physical count.
- Two vaccines with a net variance of \$438.20 for the month of August 2022.

Only those weaknesses which have come to our attention as a result of the audit have been reported. It is the responsibility of the department management to establish and maintain effective internal control over compliance with the requirement of laws, regulations, and contracts applicable to the department.

INTRODUCTION

Dallas County Auditor's Office mission is to provide responsible, progressive leadership by accomplishing the following:

- Comply with applicable laws and regulations
- Safeguard and monitor the assets of the County utilizing sound fiscal policies
- Assess risk and establish and administer adequate internal controls
- Accurately record and report financial transactions of the County
- Ensure accurate and timely processing of amounts due to County employees and vendors
- Set an example of honesty, fairness and professionalism for Dallas County government
- Provide services with integrity
- Work in partnership with all departments to resolve all issues of the County
- Strive to utilize the latest efficient and effective technology in the performance of tasks
- Provide technical support and training in the development, implementation, and maintenance of information systems
- Hold ourselves accountable to the citizens of the County at all times
- Be responsive to the elected officials and department heads of Dallas County

The objectives of this audit are to:

1. Ensure compliance with statutory requirements
2. Evaluate internal controls
3. Verification of accuracy and completeness of reporting
4. Review controls over safeguarding of assets

On August 31, 2022, Internal Audit staff performed the annual physical vaccine inventory of International Travel for the period then ended as a part of ongoing review of Health & Human Services (HHS) financial controls. The purpose of this review was limited to the reconciliation of departmental records to physical count and the official general ledger. Other procedures for testing internal control and any findings are reported separately. This report details the flow of vaccines into and out of the department, and lists the physical balances, by vaccine, at month end. There was no perpetual inventory in place at the time of this review. This audit covered the period of September 1, 2021 through August 31, 2022.

The audit procedures will include interviews with key process owners, a physical count of inventory, review of current pricing for vaccines purchased, and comparison of purchase orders to the general ledger.

DETAILS

Vaccine Summary

Prices per dose are reviewed annually by the Assistant Director of Finance, Budget and Contracts and adjusted appropriately based on costs. Multiple vaccine suppliers are used to purchase vaccines. Inventory tracking is accomplished by the use of TWICES and Adult Biological Reports. Product cost is recorded to the General Ledger expenditure accounts with year-end reclass to inventory based on physical counts. The book inventory is derived from the Monthly Adult Biological Reports (Actual Physical Count Prior Month + Dose Received Current Month + Usable Doses Returned Current Month – Doses Administered Current Month – Expired Doses Returned Current Month – Doses Transferred Out Current Month) as reported by HHS. HHS completes a self-inventory each month that is compared to the calculated inventory and verified by our Internal Audit staff. The monthly beginning inventory counts are adjusted based on the self-inventory counts.

On August 31, 2022, our Internal Audit staff performed the annual physical vaccine inventory of International Travel for the period then ended as a part of ongoing review of Health & Human Services (HHS) financial controls. The purpose of this review was limited to the reconciliation of departmental records to physical count and the official general ledger. Other procedures for testing internal control and any findings are reported separately. This report details the flow of vaccines into and out of the department, and lists the physical balances, by vaccine, at month end. There was no perpetual inventory in place at the time of this review.

Inventory result fiscal year comparisons are as follows:

Unit	Inventory	Average	
August 2022	1,041	\$106,655.25	\$102.45
August 2021	<u>6,400</u>	<u>\$190,322.02</u>	<u>\$29.74</u>
Net Change	<u>(5,359)</u>	<u>(\$83,666.77)</u>	<u>\$72.72</u>

The physical inventory value of \$106,655.25 as of August 31, 2022 will be updated to reflect actual value as of September 30, 2022 for reporting on the Annual Financial Report.

Description	September 2021 - August 2022	September 2020 - August 2021	Increases/Decreases	Percent Change
Patients Seen	4,225	3,774	451	11.950%

Purchases (only)	41	\$312,435.	97	\$383,892.	(\$71,757.56)	(18.614 %)
Revenues	89	\$135,878.	93	\$121,125.	\$14,752.96	12.180%

A review of the vaccine activity for the twelve months ended August 31, 2022 revealed five vaccines overstated by \$1,803.33 and one vaccine understated by \$108.24 compared to a physical count including two vaccines with a net variance of \$438.20 for the month of August 2022.

County Code Sec. 90-373 states that all department heads and elected officials are responsible for maintaining property assigned to their department, proper inventory records and Sec. 90-351 responsible to ensure that the property inventory records are up to date and accurate in all respects. (Admin. Policy Manual, § F (3.02, 3.03).

Best practices require separation of duties, documented procedures, and immediate reconciliation and updates for transactions. Inventory control procedures should include timely verification and follow-up on all variances. Inventory records should be updated timely and accurately. Vaccine count differences should be identified monthly by lot numbers and the quantity adjusted accordingly. Operational practices and review steps relevant to application interfaces should include procedural controls that provide reasonable assurance of accurate use of record counts, control totals, or some other type of logging vaccine information. Written procedures for proper inventory controls should be developed and implemented. Periodic inventory counts should be performed during the fiscal year to update inventory records for all quantities on hand.

A Lack of automated controls and a perpetual inventory system resulting in delays in identifying inventory variance causes and clerical errors in maintaining vaccine counts which increases the potential vaccine loss, vaccine misappropriations, and financial losses to Dallas County.

Recommendation

Vaccine Summary

HHS Foreign Travel Vaccine management should implement procedures that include:

- Establishing a perpetual inventory system

- Investigating vaccine count variances between physical and book inventories monthly with all variances documented.
- Adjusting inventory balances timely to ensure that lot numbers are properly recorded and referenced on all inventory transactions.
- Establishing vaccine inventory controls with the nurses that includes balancing at the end of each day

Management Action Plan

- The program has been advised to follow- up on the project of establishing an automated inventory system to aid the process of tracking vaccines on a perpetual basis. Management will continue to keep track of vaccine inventory through daily logs, monthly stock taking process and the monthly reporting process.
- DCHHS will continue to investigate and report vaccine variances on the monthly Vaccine End- of- The- Month Report. In addition, spillages, expirations, and spillages are recorded on the Vaccine Waste Log to document such occurrences and accompany the Vaccine End-of- Month Report.
Please note that the majority (60.6%) of the variances were associated with typhoid vaccines. Most of those vaccines were multi- dose vials, which typically yield 2- 3 doses more than the actual count.
This inherently causes overages in balances reflected in the reporting. Program nurses have been instructed to only withdraw the number of doses stated on the vaccine label and dispose remaining doses in accordance with manufacturer's guidelines.
- DCHHS will continue to make timely adjustments to vaccine inventory balances with accurate lot numbers documented.
- DCHHS will continue to balance vaccine inventory on daily basis by balancing reconciling daily vaccine waste log to actual vaccines remaining.

Auditors Response

- None
