Recommended for Award

We are proposing two separate panel boards for this project. One for the Main Split and one for the controlled split. This material from the manufacturer has a shorter lead time. The old split bus panels are no longer available and are not serviced any longer. We can offer a quicker lead time and installation time using these materials. We are proposing a Onan ATS so both the Generator and ATS will be serviced by the same manufacturer. These materials will result in a shorter outage. Cummins can provide a yearly maintenance agreement for \$2,000.00 if the County is interested.

All work for this project will be performed by our staff other than startup and training by manufacturer.
