

TRANSPORTATION PUBLIC MEETINGS

Regional Performance Targets for Transit Assets and Roadway Safety

NCTCOG uses performance measures as part of a performance-based planning process for the region's transportation system. Federal legislation has specified certain quantitative performance measures must be tracked and reported annually. In coordination with state and regional partners, staff will present proposed regional targets for measuring and evaluating the performance of two aspects of the transportation system. Roadway safety targets are focused on reducing serious injuries and fatalities for motorized and non-motorized travelers. Transit asset management targets are focused on ensuring public transportation vehicles, rail lines and other capital assets are in a state of good repair.

Funding Program: Federal/Local Exchanges

Over the last several months, NCTCOG staff has been working with local agencies that have expressed an interest in entering into partnerships with the Regional Transportation Council (RTC) to fund transportation projects in their jurisdictions. The goal of these partnerships is to implement local transportation projects while acquiring local funds for regional programs by exchanging federal air quality and mobility funds for local funds from the partner agencies. Staff will provide details on the partnerships, as well as the projects proposed to be implemented with federal transportation funds.

Other Information to be Highlighted at the Meetings:

- Funding Opportunities for Clean Vehicles and Refueling Infrastructure

The Arlington meeting will be live streamed at www.nctcog.org/video (click on the "live" tab). A video recording of this meeting will also be posted online at www.nctcog.org/input.
