## eFileTexas.gov Notification

In an effort to create a single, official electronic service email address for every attorney in Texas, The State Bar of Texas (SBOT) and the Judicial Committee on Information Technology (JCIT) are working together to provide a new process that will begin October 1, 2016.

A file including all active Texas Attorney's names and their registered SBOT email address will be imported into eFileTX, nightly, to be used as the official eService address. The names and email addresses in the current list will no longer exist.

When this new process begins you will not be able to modify your official eService address in eFileTX.

If you are not an attorney you can still add yourself as an eService contact. You will need to setup your Service Contacts list and add yourself to the case. For details on how to accomplish this, please see this [article](#).

Starting October 1, if you are a Texas attorney and your eService email address in eFileTX is incorrect, please update it on the State Bar website at [texasbar.com/eservice](http://texasbar.com/eservice).

See [this article](#) from the July 2016 *Texas Bar Journal* for more information.

If you have further questions or would like to know more information, please sign up for a free webinar at [this link](#).
