

**FOR IMMEDIATE RELEASE**  
**August 30, 2020**

**Dallas County Reports 127 New Positive 2019 Novel Coronavirus (COVID-19) Cases  
360 Total Cases Reported Today with 233 from Previous Months**

**DALLAS** -- As of 1:00 pm August 30, 2020, Dallas County Health and Human Services is reporting 360 additional confirmed cases of 2019 novel coronavirus (COVID-19), bringing the total confirmed case count in Dallas County to 71,170, including 901 confirmed deaths. The total number of probable cases in Dallas County is 2,895, including 8 probable deaths from COVID-19. Of the 360 new cases we are reporting today, 241 came through the Texas Department of State Health Services' (DSHS) electronic laboratory reporting (ELR) system, and 233 were from previous months, with over 90% from the months of April through June. Please see a provisional breakdown below of these newly reported cases by date of collection:

<b>Month</b>	<b># of positive patients</b>
March	5* (from same lab—likelihood of date entry error from lab being investigated)
April	88
May	64
June	72
July	4
August	8

The additional death being reported today is of a woman in her 70's who was a resident of the City of Dallas. She had been critically ill in an area hospital, and had underlying high risk health conditions.

From August 8<sup>th</sup> through 21<sup>st</sup>, 393 school-aged children between 5 to 18 years of age were diagnosed with COVID-19 in Dallas County. About 50% of these cases were high school age. By zip code of residence, 203 (51%) of these children were projected to have been enrolled in Dallas ISD schools.

Of all confirmed cases requiring hospitalization to date, more than two-thirds have been under 65 years of age. Diabetes has been an underlying high-risk health condition reported in about a third of all hospitalized patients with COVID-19. The provisional 7-day average daily new confirmed and probable cases (by date of test collection) for CDC week 34 was 206.

The percentage of respiratory specimens testing positive for SARS-CoV-2 continues to decline but remains high, with 11.0% of symptomatic patients presenting to area hospitals testing positive in week 34. Of the total confirmed deaths reported to date, about 26% have been associated with long-term care facilities. New cases are being reported as a daily aggregate, with a more detailed summary report updated Tuesdays and Fridays.

Local health experts use hospitalizations, ICU admissions, and ER visits as three of the key indicators in determining the COVID-19 Risk Level (color-coded risk) and corresponding guidelines for activities during our COVID-19 response. Due to weekend reporting, new data will be available on Tuesday, September 1, 2020.

- [Dallas County Guidance for Individuals at High-Risk for Severe COVID-19](#)

The Centers for Disease Control and Prevention (CDC) recommends taking everyday preventive actions to help prevent the spread of respiratory diseases, including:

- Avoid close contact outside your home: Put 6 feet of distance between yourself and people who don't live in your household.
- Cover your mouth and nose with a cloth face cover when around others and continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.
- Stay home when you are sick, except to seek medical care
- Wash your hands often and with soap and water for at least 20 seconds and help young children to do the same. If soap and water are not available, use an alcohol-base hand sanitizer with at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Clean and disinfect frequently touched objects and surfaces daily using a regular household cleaning spray or wipes.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you do not have a tissue, use your sleeve, not your hands. Immediately wash your hands.
- Monitor your health daily. Be alert for symptoms. Take your temperature and follow CDC guidance if symptoms develop.
