Dallas County Reports 1,019 New Positive 2019 Novel Coronavirus (COVID-19) Cases and 11 Deaths, including 189 Probable Cases

DALLAS -- As of 3:00 pm February 7, 2021, Dallas County Health and Human Services is reporting 1,019 additional positive cases of 2019 novel coronavirus (COVID-19) in Dallas County, 830 confirmed cases and 189 probable cases. There is a cumulative total of 235,040 confirmed cases (PCR test). There is a cumulative total of 32,314 probable cases (antigen test). A total of 2,418 Dallas County residents have lost their lives due to COVID-19 illness.

Dallas County Health and Human Services is providing initial vaccinations to those most at risk of exposure to COVID-19 and 37,243 doses of COVID-19 vaccine have been administered at the Fair Park mega-vaccine clinic, which started operations on Monday, January 11. DCHHS is expecting an allotment of 9,000 doses from the State of Texas for this week's operations.

The additional deaths being reported today include the following:

- A man in his 40's who was a resident of the City of Dallas. He was found deceased at home.
- A woman in his 50's who was a resident of the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Sunnyvale. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Grand Prairie. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 80's who was a resident of the City of Mesquite. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 80's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 80's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 90's who was a resident of a long-term care facility in the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.

Four cases of the SARS-CoV-2 variant B.1.1.7 have been identified in residents of Dallas County who did not have recent travel outside of the US. The provisional seven-day average of daily new confirmed and probable cases (by date of test collection) for CDC week 4 was **1,362**, which is a rate of **51.7** daily new cases

per 100,000 residents. The percentage of respiratory specimens testing positive for SARS-CoV-2 remains high, with **24.7%** of symptomatic patients presenting to area hospitals testing positive in week 4 (week ending 1/30/21).

During the month of January, there were 9,231 COVID-19 cases in school-aged children and staff reported from 755 separate K-12 schools in Dallas County. A total of 420 children in Dallas County under 18 years of age have been hospitalized since the beginning of the pandemic, including 32 patients diagnosed with Multisystem Inflammatory Syndrome in children (MIS-C). Over 80% of reported MIS-C cases in Dallas have occurred in children who are Hispanic or Latino or Black.

There are currently 102 active long-term care facility outbreaks. A cumulative total of 3,979 residents and 2,242 healthcare workers in long-term facilities in Dallas have been diagnosed with COVID-19. Of these, 858 have been hospitalized and 487 have died. About 22% of all deaths reported to date have been associated with long-term care facilities. Seventeen outbreaks of COVID-19 in congregate-living facilities (e.g. homeless shelters, group homes, and halfway homes) have been reported in the past 30 days. A cumulative total of 383 residents and 190 staff members in congregate-living facilities in Dallas have been diagnosed with COVID-19.

Of all confirmed cases requiring hospitalization to date, more than two-thirds have been under 65 years of age. Diabetes has been an underlying high-risk health condition reported in about a third of all hospitalized patients with COVID-19. New cases are being reported as a daily aggregate, with more detailed summary reports updated Tuesday and Friday evenings are available at:

<https://www.dallascounty.org/departments/dchhs/2019-novel-coronavirus/daily-updates.php>.

Local health experts use hospitalizations, ICU admissions, and ER visits as three of the key indicators in determining the COVID-19 Risk Level (color-coded risk) and corresponding guidelines for activities during our COVID-19 response. Due to weekend reporting, new data will be available on Tuesday, February 9, 2021.

The Centers for Disease Control and Prevention (CDC) recommends taking everyday preventive actions to help prevent the spread of respiratory diseases, including:

- Avoid close contact outside your home: Put 6 feet of distance between yourself and people who don't live in your household.
- Cover your mouth and nose with a cloth face cover when around others and continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.
- Stay home when you are sick, except to seek medical care
- Wash your hands often and with soap and water for at least 20 seconds and help young children to do the same. If soap and water are not available, use an alcohol-base hand sanitizer with at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.

- Clean and disinfect frequently touched objects and surfaces daily using a regular household cleaning spray or wipes.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you do not have a tissue, use your sleeve, not your hands. Immediately wash your hands.
- Monitor your health daily. Be alert for symptoms. Take your temperature and follow CDC guidance if symptoms develop.
