

## FOR IMMEDIATE RELEASE April 14, 2021

## Dallas County Reports 285 New Positive 2019 Novel Coronavirus (COVID-19) Cases and 20 Deaths, Including 61 Probable Cases

**DALLAS** -- As of 2:00 pm April 14, 2021 Dallas County Health and Human Services is reporting 285 additional positive cases of 2019 novel coronavirus (COVID-19) in Dallas County, 224 confirmed cases and 61 probable cases. There is a cumulative total of 254,591 confirmed cases (PCR test). There is a cumulative total of 40,306 probable cases (antigen test). A total of 3,747 Dallas County residents have lost their lives due to COVID-19 illness.

Dallas County Health and Human Services (DCHHS) is providing initial vaccinations to those most at risk of exposure to COVID-19 and over 359,000 total doses of COVID-19 vaccine have been administered at the Fair Park mega-vaccine clinic, which started operations on Monday, January 11. Vaccine operations for both first and second doses at Fair Park will continue through Saturday.

The additional deaths being reported today include the following:

- A woman in her 50's who was a resident of the City of Cedar Hill. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 50's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 50's who was a resident of the City of Irving. He was found deceased at home and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Seagoville. She had been hospitalized and had underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Irving. She expired at home and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Richardson. She expired at home and had underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Garland. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Dallas. He was found deceased at home and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Dallas. He was critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 70's who was a resident of the City of Irving. She expired in a facility and had underlying high risk health conditions.
- A woman in her 70's who was a resident of the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.

- A man in his 70's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 70's who was a resident of the City of Garland. She had been hospitalized and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Irving. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Irving. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 80's who was a resident of a long-term care facility in the City of Dallas. She expired in hospice and had underlying high risk health conditions.

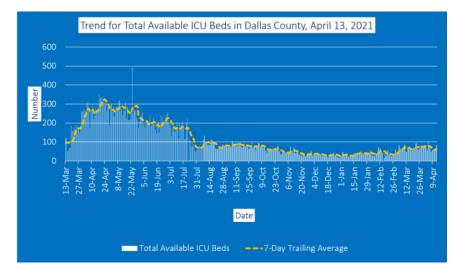

To date, a total of 57 cases of the SARS-CoV-2 variant B.1.1.7; six cases of B.1.429 variants; and one case of a B.1.526 variant have been identified in residents of Dallas County. Four have been hospitalized with 2 requiring intensive care unit admission. Seven had history of recent domestic travel outside of Texas. One case of B.1.1.7 is a likely instance of reinfection with COVID-19, occurring over 6 months after an initial PCR-confirmed infection. The provisional seven-day average of daily new confirmed and probable cases (by date of test collection) for CDC week 13 was **202**, which is a rate of **7.7** daily new cases per 100,000 residents. The percentage of respiratory specimens testing positive for SARS-CoV-2 remains high, and with **8.3%** of symptomatic patients presenting to area hospitals testing positive in week 13 (week ending 4/3/21).

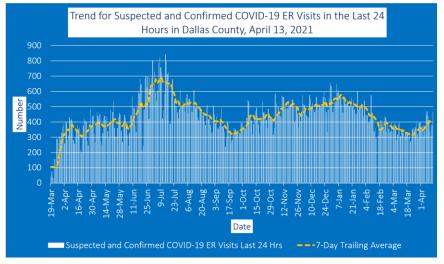

During the past 30 days, there were 1,110 COVID-19 cases in school-aged children and staff reported from 351 separate K-12 schools in Dallas County. Fifteen of the newly reported cases over the past week have been associated with youth sports. There are currently 22 active long-term care facility outbreaks. A cumulative total of 4,307 residents and 2,435 healthcare workers in long-term facilities in Dallas have been diagnosed with COVID-19. Of these, 1,044 have been hospitalized and 716 have died. About 20% of all deaths reported to date have been associated with long-term care facilities. Nine outbreaks of COVID-19 in congregate-living facilities (e.g. homeless shelters, group homes, and halfway homes) have been reported in the past 30 days. A cumulative total of 486 residents and 214 staff members in congregate-living facilities in Dallas have been diagnosed with COVID-19.

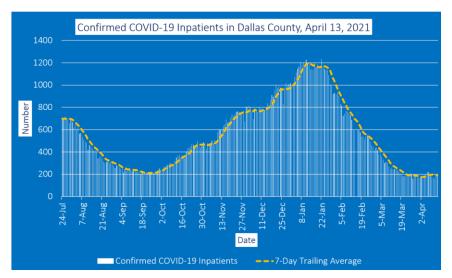

Of all confirmed cases requiring hospitalization to date, more than two-thirds have been under 65 years of age. Diabetes has been an underlying high-risk health condition reported in about a third of all hospitalized patients with COVID-19. New cases are being reported as a daily aggregate, with more detailed summary reports updated Tuesday and Friday evenings are available at: <u>https://www.dallascounty.org/departments/dchhs/2019-novel-coronavirus/daily-updates.php</u>.

Local health experts use hospitalizations, ICU admissions, and ER visits as three of the key indicators as part of determining the COVID-19 Risk Level (color-coded risk) and corresponding guidelines for activities during our COVID-19 response. There were 204 COVID-19 patients in acute care in Dallas County for the period ending on April 13. The number of emergency room visits for COVID-19 like symptoms in Dallas County was 467 for the same time-period, which represents around 15 percent of all emergency department visits in the county according to information reported to the North Central Texas Trauma Regional Advisory Council. Please continue to do your part to reduce spread. Masking, social distancing and avoiding gatherings, as well as getting your vaccination. Removal of some restrictions by the CDC is still very limited for those who are vaccinated, and medium and large gatherings especially indoors should still be avoided by all individuals regardless of vaccination status. Updated UTSW forecasting reflects an increase within their model with hospitalizations between 140-180 and daily case counts of 350 by April 29th. Modeling indicates if there are major changes to

personal behaviors, such as not masking or social distancing, that we could see substantial surge. You can find additional information on risk-level monitoring data <u>here.</u>

"Today we report 285 new COVID-19 cases and 20 deaths. Hospitalizations and deaths are preventable by the COVID-19 vaccine and we now have enough vaccine so that those who want the vaccine can register online at <u>www.DallasCounty.org</u> and get a vaccine the same day or the following day at Fair Park.

It is also now possible if you are age 55 or older to come to Fair Park without pre-registering and without an appointment and we will get you vaccinated that day. For a faster experience, go to <u>www.DallasCounty.org</u> and pre-register before coming to Fair Park if you are 55 or older. All others can also pre-register and get a vaccine the same day or the following day. The most important thing that we can do at this point to defeat COVID is to get vaccinated. Please do your part and get vaccinated and encourage everyone you know to get vaccinated as soon as possible, and together, we will defeat COVID," said Dallas County Judge Clay Jenkins.

## All Dallas County COVID-19 Updates and Information can be found here:

- Dallas County Guidance for Individuals at High-Risk for Severe COVID-19

The Centers for Disease Control and Prevention (CDC) recommends taking everyday preventive actions to help prevent the spread of respiratory diseases, including:

- Avoid close contact outside your home: Put 6 feet of distance between yourself and people who don't live in your household.
- Cover your mouth and nose with a cloth face cover when around others and continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.
- Stay home when you are sick, except to seek medical care
- Wash your hands often and with soap and water for at least 20 seconds and help young children to do the same. If soap and water are not available, use an alcohol-base hand sanitizer with at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Clean and disinfect frequently touched objects and surfaces daily using a regular household cleaning spray or wipes.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you do not have a tissue, use your sleeve, not your hands. Immediately wash your hands.
- Monitor your health daily. Be alert for symptoms. Take your temperature and follow CDC guidance if symptoms develop.
