July 14, 2021

Dallas County Reports Total of 240 New Positive 2019 Novel Coronavirus (COVID-19) Cases and 2 Deaths, Including 31 Probable Cases

DALLAS -- As of 3:00 pm July 14, 2021 Dallas County Health and Human Services is reporting 240 additional positive cases of 2019 novel coronavirus (COVID-19) in Dallas County, 209 confirmed cases and 31 probable cases. There is a cumulative total of 264,845 confirmed cases (PCR test). There is a cumulative total of 44,108 probable cases (antigen test). A total of 4,154 Dallas County residents have lost their lives due to COVID-19 illness.

Dallas County Health and Human Services (DCHHS) is providing initial vaccinations to those most at risk of exposure to COVID-19 and over 496,000 total doses of COVID-19 vaccine have been administered at the Fair Park mega-vaccine clinic, which started operations on Monday, January 11. Vaccine operations for both first and second doses will end at Fair Park on Saturday, July 17.

The additional deaths being reported today include the following:

- A man in his 40's who was a resident of the City of Dallas. He had been critically ill in an area hospital and did not have underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Mesquite. He was found deceased at home and had underlying high risk health conditions.

To date, a total of 172 cases with SARS-CoV-2 variants of concern have been identified in residents of Dallas County, including: 137 cases of B.1.1.7 (Alpha) variants; three B.1.351 (Beta) variants; fifteen B.1.617.2 (Delta) variants; and seventeen P.1 (Gamma) variants. Nineteen have been hospitalized and three have died.

One fully vaccinated patient subsequently became ill from B.1.1.7 infection and died. The provisional seven-day average of daily new confirmed and probable cases (by date of test collection) for CDC week 26 (week ending 7/3/21), was **125**, which is a rate of **4.7** daily new cases per 100,000 residents. Over the past 2 weeks, rates of new COVID-19 diagnoses in the cities of Addison, Lancaster, Sachse and Seagoville have been about 50% higher than county-wide case rates. Rates of new COVID-19 diagnoses in the city of Cedar Hill, Garland and Rowlett have been about 30% higher than county-wide case rates.

As of the week ending 7/3/2021, about 58% of Dallas County residents age 12 years and older have received at least one dose of COVID-19 vaccine, including: 84% of residents age 65 years and older; 65% of residents between 40-64 years of age; 52% of residents 25-39 years of age; 41% of residents 18-24 years of age; and 28% of residents 12-17 years of age. In the cities of Coppell and Sunnyvale, greater than 87% of residents 18 years of age and older have received at least one dose of COVID-19 vaccine. In the cities of Addison and Highland Park, about 78% of residents 18 years of age and older have received at least one dose of COVID-19 vaccine. (See below) About 86% of COVID-19 cases diagnosed in Week 25 were Dallas County residents who were not fully vaccinated. In Dallas County, 1,105 cases of COVID-19 breakthrough COVID-19 infections in fully vaccinated individuals have been confirmed to date, of which 93 (8%) were hospitalized and 14 have died due to COVID-19.

An outbreak of 3 cases of COVID-19 has been reported involving three children between 7-10 years of age, attending a day camp in Dallas County. To date, 68 children have been hospitalized with diagnoses of multisystem inflammatory syndrome (MIS-C), a rare but serious complication associated with COVID-19 infection. Of all Dallas County residents tested for COVID-19 by PCR during the week ending 7/3/21 (CDC week 26), **5.3%** of respiratory specimens tested positive for SARS-CoV-2. For week 26, area hospital labs have continued to report elevated numbers and proportions of respiratory specimens that are positive for other respiratory viruses by molecular tests: parainfluenza (10%), rhinovirus/enterovirus (24%) and RSV (29%).

There are currently 6 active long-term care facility outbreaks. A cumulative total of 4,406 residents and 2,483 healthcare workers in long-term facilities in Dallas have been diagnosed with COVID-19. Of these, 1,128 have been hospitalized and 811 have died. About 20% of all deaths reported to date have been associated with long-term care facilities. One outbreak of COVID-19 in a congregate-living facility (e.g. homeless shelters, group homes, and halfway homes) has been reported in the past 30 days. A cumulative total of 640 residents and 225 staff members in congregate-living facilities in Dallas have been diagnosed with COVID-19. New cases are being reported as a daily aggregate, with more detailed data dashboards and summary reports updated on Friday evenings, available at: <https://www.dallascounty.org/departments/dchhs/2019-novel-coronavirus/daily-updates.php>.

Local health experts use hospitalizations, ICU admissions, and ER visits as three of the key indicators as part of determining the COVID-19 Risk Level (color-coded risk) and corresponding guidelines for activities during our COVID-19 response. The most recent COVID-19 hospitalization data for Dallas County, as reported to the North Central Texas Trauma Regional Advisory Council, can be found at www.dallascounty.org/covid-19 under “Monitoring Data,” and is updated regularly. This data includes information on the total available ICU beds, suspected and confirmed COVID-19 ER visits in the last 24 hours, confirmed COVID-19 inpatients, and COVID-19 deaths by actual date of death. The most recent forecasting from UTSW can be found [here](#).

Number and Percentage of Residents ≥18 Years Vaccinated for COVID-19 by City, Dallas County

As of Week Ending 7/3/21 (MMWR Week 26)					
City	Population of City ≥18 years of age ²	Cumulative Residents ≥18 Years who Received ≥1 Dose of COVID-19 Vaccine ¹	Percent of Residents ≥18 Years Vaccinated with at Least 1 Dose ³	Cumulative Residents ≥18 Years Fully Vaccinated ⁴	Percent of Residents ≥18 Years Fully Vaccinated ^{3,4}
Addison	13,061	10,209	78%	7,771	60%

Countywide Total⁵	1,940,671	1,174,827	61%	897,680	46%

¹Does not include vaccinated persons who reside in portions of these cities which are not within Dallas County.

²U.S. Census 2019 estimates of populations of city residents 18 years and older, inclusive of portions of cities located outside of Dallas County.

³Not Available (N/A): vaccine coverage not calculated for cities in which >20% of the city population resides outside of Dallas County.

⁴Fully vaccinated = persons who have received 2 doses of mRNA vaccines or 1 dose of Johnson & Johnson COVID-19 vaccine.

⁵Includes only residents with Dallas County--does not include persons who reside in portions of these cities which are not within Dallas County.

“Today we report 240 new COVID cases and two additional deaths. With the Delta variant surging, it’s children under the age of 12 that will pay a heavy price for the decision of those 12 and older to not be vaccinated. Our youngest residents are unable to be vaccinated and must rely on those over 12 getting vaccinated to help protect them.

We are seeing an over 50% increase in Texas over the last week in the number of COVID cases because of the highly infectious and deadly Delta variant and scientists are now discovering that up to 30% of those studied who recovered from COVID, have some form of long haul neurological or psychological damage. The best way to protect yourself against COVID and long-haul syndrome is to get a free, safe, and effective vaccine. Do it for yourself and for the children who are too young to get vaccinated and are relying on you to protect them,” said Dallas County Judge Clay Jenkins.

The Centers for Disease Control and Prevention (CDC) recommends taking everyday preventive actions to help prevent the spread of respiratory diseases, including:

- If you're unvaccinated, avoid close contact outside your home and put 6 feet of distance between yourself and people who don't live in your household.
- Cover your mouth and nose with a cloth face cover when around others and continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.
- Stay home when you are sick, except to seek medical care
- Wash your hands often and with soap and water for at least 20 seconds and help young children to do the same. If soap and water are not available, use an alcohol-base hand sanitizer with at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Clean and disinfect frequently touched objects and surfaces daily using a regular household cleaning spray or wipes.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you do not have a tissue, use your sleeve, not your hands. Immediately wash your hands.
- Monitor your health daily. Be alert for symptoms. Take your temperature and follow CDC guidance if symptoms develop.
