**Dallas County Reports Total of 1,493 New Positive 2019 Novel Coronavirus (COVID-19) Cases and 14 Deaths, Including 536 Probable Cases**

**DALLAS** -- As of 3:00 pm September 13, 2021 Dallas County Health and Human Services is reporting 1,493 additional positive cases of 2019 novel coronavirus (COVID-19) in Dallas County, 957 confirmed cases and 536 probable cases. There is a cumulative total of 313,601 confirmed cases (PCR test). There is a cumulative total of 54,170 probable cases (antigen test). A total of 4,437 Dallas County residents have lost their lives due to COVID-19 illness. Today's press release includes the new case totals accumulated from Friday. Tomorrow's press release will include the numbers of new cases from Saturday, Sunday and Monday.

Dallas County Health and Human Services (DCHHS) provided more than 500,000 total doses of COVID-19 vaccine at the Fair Park mega-vaccine clinic, which operated January 11 through July 17. A pop-up vaccination clinic at Fair Park will take place on Saturdays through September 18, from 8am-2pm in Lot 13 for Pfizer first and second doses.

The additional deaths being reported today include the following:

- A man in his 30's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 40's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 50's who was a resident of the City of Garland. He had been hospitalized and had underlying high risk health conditions.
- A woman in her 50's who was a resident of the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 50's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Irving. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Cedar Hill. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Dallas. She had been hospitalized and had underlying high risk health conditions.
- A woman in her 70's who was a resident of a long-term care facility in the City of Richardson. She expired in hospice and had underlying high risk health conditions.
- A woman in her 70's who was a resident of a long-term care facility in the City of Duncanville. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 80's who was a resident of the City of Dallas. He was found deceased at home and had underlying high risk health conditions.
- A man in his 80's who was a resident of the City of Dallas. He expired at home and did not have underlying high risk health conditions.

- A man in his 80's who was a resident of the City of Richardson. He had been hospitalized and had underlying high risk health conditions.
- A woman in her 90's who was a resident of a long-term care facility in the City of Mesquite. She expired in the facility and had underlying high risk health conditions.

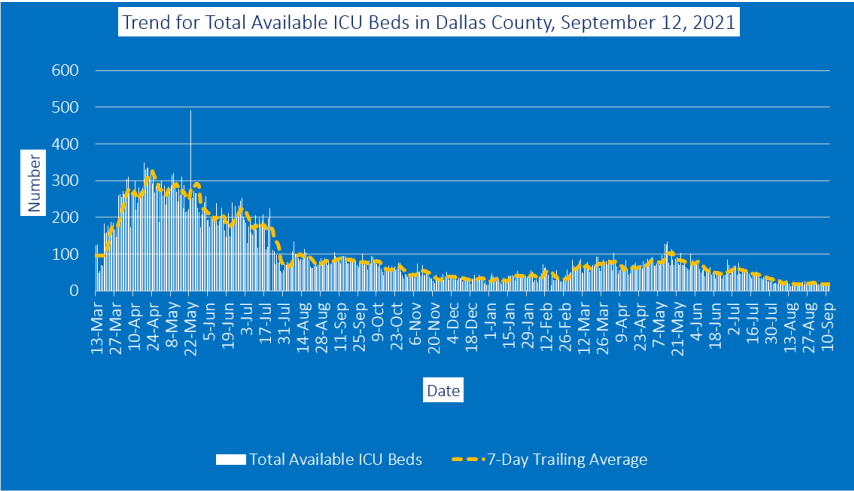

To date, a total of 205 cases with SARS-CoV-2 variants of concern have been identified in residents of Dallas County, including: 146 cases of B.1.1.7 (Alpha) variants; three B.1.351 (Beta) variants; thirty-six B.1.617.2 (Delta) variants; and twenty P.1 (Gamma) variants. Twenty-three have been hospitalized and four have died. One fully vaccinated patient subsequently became ill from B.1.1.7 infection and died. The provisional seven-day average of daily new confirmed and probable cases (by date of test collection) for CDC week 35 (week ending 9/4/21) was **1,123**, which is a rate of **42.6** daily new cases per 100,000 residents.

As of the week ending 9/4/2021, about 68% of Dallas County residents age 12 years and older have received at least one dose of COVID-19 vaccine, including: 88% of residents age 65 years and older; 74% of residents between 40-64 years of age; 63% of residents 25-39 years of age; 53% of residents 18-24 years of age; and 48% of residents 12-17 years of age. In the cities of Coppell and Sunnyvale, greater than 90% of residents 18 years of age and older have received at least one dose of COVID-19 vaccine. In the cities of Addison, Highland Park and Irving, greater than 80% of residents 18 years of age and older have received at least one dose of COVID-19 vaccine. (*See below*). About 84% of COVID-19 cases diagnosed in Week 35 were Dallas County residents who were not fully vaccinated. In Dallas County, 7,781 cases of COVID-19 breakthrough COVID-19 infections in fully vaccinated individuals have been confirmed to date, of which 241 (3.1%) were hospitalized and 47 have died due to COVID-19.

Of all Dallas County residents tested for COVID-19 by PCR during the week ending 9/4/2021 (CDC week 35), **22.7%** of respiratory specimens tested positive for SARS-CoV-2. For week 34, area hospital labs have continued to report elevated numbers and proportions of respiratory specimens that are positive for other respiratory viruses by molecular tests: parainfluenza (3.0%), rhinovirus/enterovirus (38%) and RSV (14%). There are currently 72 active long-term care facility outbreaks. A cumulative total of 4,560 residents and 2,676 healthcare workers in long-term facilities in Dallas have been diagnosed with COVID-19. Of these, 1,151 have been hospitalized and 824 have died. About 19% of all deaths reported to date have been associated with long-term care facilities.

There have been 22 outbreaks of COVID-19 in a congregate-living facility (e.g. homeless shelters, group homes, and halfway homes) reported within the past 30 days. A cumulative total of 713 residents and 239 staff members in congregate-living facilities in Dallas have been diagnosed with COVID-19. New cases are being reported as a daily aggregate, with more detailed data dashboards and summary reports updated on Friday evenings, available at: <https://www.dallascounty.org/departments/dchhs/2019-novel-coronavirus/daily-updates.php>.

Local health experts use hospitalizations, ICU admissions, and ER visits as three of the key indicators as part of determining the COVID-19 Risk Level (color-coded risk) and corresponding guidelines for activities during our COVID-19 response. The most recent COVID-19 hospitalization data for Dallas County, as reported to the North Central Texas Trauma Regional Advisory Council, can be found at [www.dallascounty.org/covid-19](http://www.dallascounty.org/covid-19) under "Monitoring Data," and is updated regularly. This data includes information on the total available ICU beds, suspected and confirmed COVID-19 ER visits in the last 24 hours, confirmed COVID-19 inpatients, and COVID-19 deaths by actual date of death. The most recent forecasting from UTSW can be found [here](#).

| Dallas County Residents Vaccinated for COVID-19 by City: as of Week Ending 9/4/21 (MMWR Week 35) |  |   |   |   |  |  |  |

<sup>1</sup> Does not include vaccinated persons who reside in portions of these cities which are not within Dallas County.

<sup>2</sup> U.S. Census 2019 estimates of populations of city residents 18 years and older, inclusive of portions of cities located outside of Dallas County.

<sup>3</sup> Not Available (N/A): vaccine coverage not calculated for cities in which >20% of the city population resides outside of Dallas County.

<sup>4</sup> Fully vaccinated = persons who have received 2 doses of mRNA vaccines or 1 dose of Johnson & Johnson COVID-19 vaccine.

<sup>5</sup> Includes only residents with Dallas County--does not include persons who reside in portions of these cities which are not within Dallas County.

“Today we report 1,493 additional cases and 14 deaths. There are currently no pediatric ICU beds available in the region, and 58 adult ICU beds available. Across our region, more than half of all patients in ICU have COVID-19. Our hospitalization numbers continue to be very high. And while we are hopeful of a peak and flattening of our hospitalization numbers soon, that is entirely up to the behavior of the people in Dallas County and North Texas. We must continue to get vaccinated and, regardless of our vaccination status, wearing our mask indoors when outside our own home, and also at large outdoor events when distancing is not possible, such as in a seated sports event. Large crowds of any type are not recommended by doctors for anyone during this period of high community spread. We can’t do everything, but we can all do something. If we all play our part and get vaccinated, we can put COVID-19 behind us,” said Dallas County Judge Clay Jenkins.

The Centers for Disease Control and Prevention (CDC) recommends taking everyday preventive actions to help prevent the spread of respiratory diseases, including:

- If you're unvaccinated, avoid close contact outside your home and put 6 feet of distance between yourself and people who don't live in your household.
- Cover your mouth and nose with a cloth face cover when around others and continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.
- Stay home when you are sick, except to seek medical care
- Wash your hands often and with soap and water for at least 20 seconds and help young children to do the same. If soap and water are not available, use an alcohol-base hand sanitizer with at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Clean and disinfect frequently touched objects and surfaces daily using a regular household cleaning spray or wipes.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you do not have a tissue, use your sleeve, not your hands. Immediately wash your hands.
- Monitor your health daily. Be alert for symptoms. Take your temperature and follow CDC guidance if symptoms develop.
- CDC recommends that anyone with any signs or symptoms of COVID-19 get tested, regardless of vaccination status or prior infection.
- If you get tested because you have symptoms or were potentially exposed to the virus, you should stay away from others pending test results and follow the advice of your health care provider or a public health professional.
