Dallas County Reports Total of 1,074 New Positive 2019 Novel Coronavirus (COVID-19) Cases and 17 Deaths, Including 378 Probable Cases

DALLAS -- As of 1:00 pm September 27, 2021 Dallas County Health and Human Services is reporting 1,074 additional positive cases of 2019 novel coronavirus (COVID-19) in Dallas County, 696 confirmed cases and 378 probable cases. There is a cumulative total of 326,995 confirmed cases (PCR test). There is a cumulative total of 57,256 probable cases (antigen test). A total of 4,604 Dallas County residents have lost their lives due to COVID-19 illness. Today's press release includes the new case totals accumulated from Friday. Tomorrow's press release will include the numbers of new cases from Saturday, Sunday and Monday.

Dallas County Health and Human Services (DCHHS) provided more than 500,000 total doses of COVID-19 vaccine at the Fair Park mega-vaccine clinic, which operated January 11 through July 17. A pop-up vaccination clinic took place at Fair Park through September 18. DCHHS will make the vaccine available every day the State Fair is open, from 10am-6pm, at a clinic located behind Big Tex between the Tower and Grand buildings.

The additional deaths being reported today include the following:

- A female youth in her 10's who was a resident of the City of Mesquite. She expired in an area hospital ED and had underlying high risk health conditions.
- A woman in her 20's who was a resident of the City of Dallas. She expired in an area hospital ED and had underlying high risk health conditions.
- A woman in her 20's who was a resident of the City of Mesquite. She had been hospitalized and did not have underlying high risk health conditions.
- A woman in her 30's who was a resident of the City of Grand Prairie. She was found deceased at home and had underlying high risk health conditions.
- A woman in her 40's who was a resident of the City of Cedar Hill. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 40's who was a resident of the City of Irving. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 40's who was a resident of the City of Mesquite. He expired in an area hospital ED and had underlying high risk health conditions.
- A woman in her 40's who was a resident of the City of Desoto. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 40's who was a resident of the City of Dallas. He was found deceased at home and had underlying high risk health conditions.
- A woman in her 40's who was a resident of the City of Lancaster. She had been hospitalized and had underlying high risk health conditions.
- A woman in her 50's who was a resident of the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.

- A man in his 50's who was a resident of the City of Garland. He was found deceased at home and did not have underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Desoto. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 70's who was a resident of the City of Garland. She had been hospitalized and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Irving. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 80's who was a resident of the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 80's who was a resident of the City of Irving. He expired in hospice and had underlying high risk health conditions.

To date, a total of 205 cases with SARS-CoV-2 variants of concern have been identified in residents of Dallas County, including: 146 cases of B.1.1.7 (Alpha) variants; three B.1.351 (Beta) variants; thirty-six B.1.617.2 (Delta) variants; and twenty P.1 (Gamma) variants. Twenty-three have been hospitalized and four have died. One fully vaccinated patient subsequently became ill from B.1.1.7 infection and died. The provisional seven-day average of daily new confirmed and probable cases (by date of test collection) for CDC week 37 (week ending 9/18/21) was **934**, which is a rate of **35.4** daily new cases per 100,000 residents.

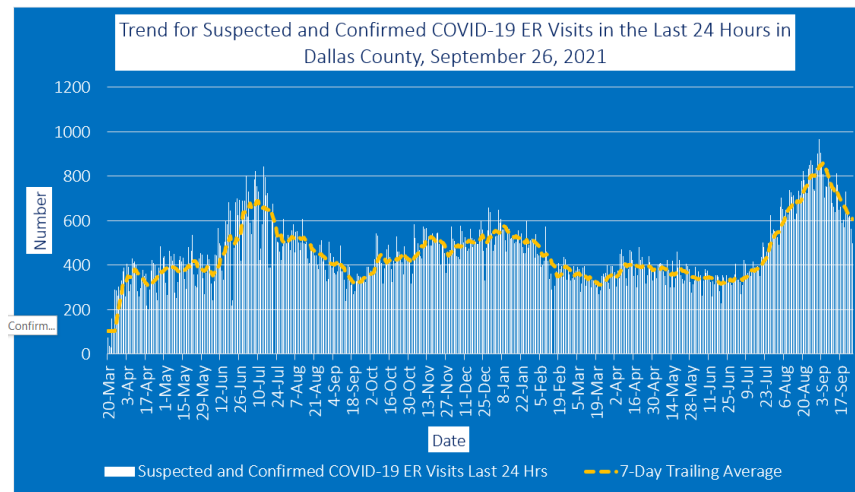

As of the week ending 9/18/2021, about 69% of Dallas County residents age 12 years and older have received at least one dose of COVID-19 vaccine, including: 89% of residents age 65 years and older; 76% of residents between 40-64 years of age; 65% of residents 25-39 years of age; 55% of residents 18-24 years of age; and 51% of residents 12-17 years of age. In the cities of Addison, Coppell, and Sunnyvale, greater than 90% of residents 18 years of age and older have received at least one dose of COVID-19 vaccine. In the cities of Highland Park and Irving, greater than 80% of residents 18 years of age and older have received at least one dose of COVID-19 vaccine. (See below). About 83% of COVID-19 cases diagnosed in Week 37 were Dallas County residents who were not fully vaccinated. In Dallas County, 8,946 cases of COVID-19 breakthrough COVID-19 infections in fully vaccinated individuals have been confirmed to date, of which 403 (4.5%) were hospitalized and 73 have died due to COVID-19.

Of all Dallas County residents tested for COVID-19 by PCR during the week ending 9/18/2021 (CDC week 37), **13.5%** of respiratory specimens tested positive for SARS-CoV-2. For week 37, area hospital labs have continued to report elevated numbers and proportions of respiratory specimens that are positive for other respiratory viruses by molecular tests: parainfluenza (1.9%), rhinovirus/enterovirus (33%) and RSV (10%). There are currently 68 active long-term care facility outbreaks. A cumulative total of 4,647 residents and 2,750 healthcare workers in long-term facilities in Dallas have been diagnosed with COVID-19. Of these, 1,159 have been hospitalized and 830 have died. About 18% of all deaths reported to date have been associated with long-term care facilities.

There have been 15 outbreaks of COVID-19 in a congregate-living facility (e.g. homeless shelters, group homes, and halfway homes) reported within the past 30 days. A cumulative total of 728 residents and 244 staff members in congregate-living facilities in Dallas have been diagnosed with COVID-19. New cases are being reported as a daily aggregate, with more detailed data dashboards and summary reports updated on Friday evenings, available at: <https://www.dallascounty.org/departments/dchhs/2019-novel-coronavirus/daily-updates.php>.

Local health experts use hospitalizations, ICU admissions, and ER visits as three of the key indicators as part of determining the COVID-19 Risk Level (color-coded risk) and corresponding guidelines for activities during our COVID-19 response. The most recent COVID-19 hospitalization data for Dallas County, as reported to the North Central Texas Trauma Regional Advisory Council, can be found at www.dallascounty.org/covid-19 under "Monitoring Data," and is updated regularly. This data includes information on the total available ICU

beds, suspected and confirmed COVID-19 ER visits in the last 24 hours, confirmed COVID-19 inpatients, and COVID-19 deaths by actual date of death. The most recent forecasting from UTSW can be found [here](#).

Dallas County Residents Vaccinated for COVID-19 by City: as of Week Ending 9/18/21 (MMWR Week 37)							
City	Population of City ≥18 years of age ²	Cumulative Residents 12-17 Years who Received ≥ 1 Dose of COVID-19 Vaccine ¹	Cumulative Residents ≥18 Years who Received ≥ 1 Dose of COVID-19 Vaccine ¹	Percent of Residents ≥18 Years Vaccinated with at Least 1 Dose ³	Cumulative Residents 12-17 Years Fully Vaccinated ⁴	Cumulative Residents ≥18 Years Fully Vaccinated ⁴	Percent of Residents ≥18 Years Fully Vaccinated ^{3,4}

¹Does not include vaccinated persons who reside in portions of these cities which are not within Dallas County.

²U.S. Census 2019 estimates of populations of city residents 18 years and older, inclusive of portions of cities located outside of Dallas County.

³Not Available (N/A): vaccine coverage not calculated for cities in which >20% of the city population resides outside of Dallas County.

⁴Fully vaccinated = persons who have received 2 doses of mRNA vaccines or 1 dose of Johnson & Johnson COVID-19 vaccine.

⁵Includes only residents with Dallas County--does not include persons who reside in portions of these cities which are not within Dallas County.

“The number of new cases have remained consistently high in recent days. There is still a high level of COVID-19 spread in our community. Please don’t assume it’s just allergies or a cold, test if you have symptoms or have been exposed. To find a list of COVID-19 testing sites in Dallas County, please visit:

<https://www.dallascounty.org/covid-19/testing-locations.php>. We will update with new testing site options as they become available. Thanks to our continued use of mitigating measures, including vaccination, the number of hospitalizations has started to slowly decline. The community members at highest risk of severe illness due to COVID-19 are the unvaccinated. In recent days we have started to provide more and more third dose vaccinations to certain residents who qualify. It is particularly important for all individuals over 65 and older and individuals over 50 with underlying conditions who received their second dose of Pfizer more than 6

months ago to find a location to receive their booster shot. To find a vaccination location near you, please visit [Vaccines.gov](https://www.vaccines.gov),” said Dallas County Judge Clay Jenkins.

All Dallas County COVID-19 Updates and Information can be found here:

- [Dallas County Guidance for Individuals at High-Risk for Severe COVID-19](#)

The Centers for Disease Control and Prevention (CDC) recommends taking everyday preventive actions to help prevent the spread of respiratory diseases, including:

- If you’re unvaccinated, avoid close contact outside your home and put 6 feet of distance between yourself and people who don’t live in your household.
- Cover your mouth and nose with a cloth face cover when around others and continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.
- Stay home when you are sick, except to seek medical care
- Wash your hands often and with soap and water for at least 20 seconds and help young children to do the same. If soap and water are not available, use an alcohol-base hand sanitizer with at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Clean and disinfect frequently touched objects and surfaces daily using a regular household cleaning spray or wipes.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you do not have a tissue, use your sleeve, not your hands. Immediately wash your hands.
- Monitor your health daily. Be alert for symptoms. Take your temperature and follow CDC guidance if symptoms develop.
- CDC recommends that anyone with any signs or symptoms of COVID-19 get tested, regardless of vaccination status or prior infection.
- If you get tested because you have symptoms or were potentially exposed to the virus, you should stay away from others pending test results and follow the advice of your health care provider or a public health professional.
