

FOR IMMEDIATE RELEASE

February 04, 2022

Dallas County Reports a Total of 1,185 New Positive 2019 Novel Coronavirus (COVID-19) Cases and 13 Deaths, Including 201 Probable Cases

DALLAS -- As of 12:00 pm February 04, 2022 Dallas County Health and Human Services is reporting 1,185 additional positive cases of 2019 novel coronavirus (COVID-19) in Dallas County, 984 confirmed cases and 201 probable cases. There is a cumulative total of 454,747 confirmed cases (PCR test). There is a cumulative total of 95,677 probable cases (antigen test). A total of 5,801 Dallas County residents have lost their lives due to COVID-19 illness.

Dallas County Health and Human Services (DCHHS) provided more than 500,000 total doses of COVID-19 vaccine at the Fair Park mega-vaccine clinic, which operated January 11 through July 17. A vaccination clinic is open at the Dallas College Eastfield Campus Location on Tuesdays – Saturdays from 9am-6pm, and on Sundays from 10am – 4pm. A weekly pop-up vaccination clinic will also take place at Fair Park on Sundays, from 10am – 4pm, starting November 21st, 2021.

The additional deaths being reported today include the following:

- A woman in her 50's who was a resident of the City of Irving. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Mesquite. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Mesquite. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Desoto. He was found deceased at home and had underlying high risk health conditions.
- A man in her 70's who was a resident of the City of Lancaster. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 70's who was a resident of the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 70's who was a resident of the City of Mesquite. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in her 70's who was a resident of a long-term care facility in the City of Dallas. He had hospitalized and had underlying high risk health conditions.

- A man in her 70's who was a resident of the City of Duncanville. He was found deceased at home and did not have underlying high risk health conditions.
- A woman in her 80's who was a resident of the City of Dallas. She had been hospitalized and had underlying high risk health conditions.
- A man in his 80's who was a resident of the City of Dallas. He had been hospitalized and had underlying high risk health conditions.
- A man in his 80's who was a resident of the City of Dallas. He had been hospitalized and had underlying high risk health conditions.
- A woman in her 80's who was a resident of the City of Dallas. She has been critically ill in an area hospital and had underlying high risk health conditions.

To date, a total of 1,196 cases with SARS-CoV-2 variants have been identified and investigated in residents of Dallas County, including: 162 cases of B.1.1.7 (Alpha); 4 cases of B.1.351 (Beta); 964 cases of B.1.617.2 (Delta); 14 cases of B.1.427 (Epsilon); 20 cases of P.1 (Gamma); 9 cases of B.1.526 (Iota); 4 case of C.37 (Lambda); 2 cases of B.1.621 (Mu); 16 cases of B.1.1.529 (Omicron); and 1 case of P.2 (Zeta). Two hundred and thirty-four cases have been hospitalized and 38 have died. Nineteen COVID-19 variant cases were reinfections. Two hundred and ninety-five people were considered fully vaccinated before infection with a COVID-19 variant.

As of 2/4/2022, a total of **12,360** confirmed and probable cases were reported in CDC week 4 (week ending 1/29/22), which is a weekly rate of **469.0** new cases per 100,000 residents.

As of the week ending 1/22/2022, about 79% of Dallas County residents age 12 years and older have received at least one dose of COVID-19 vaccine, including: 97% of residents age 65 years and older; 85% of residents between 40-64 years of age; 76% of residents 25-39 years of age; 65% of residents 18-24 years of age; and 60% of residents 12-17 years of age. In the cities of Addison, Coppell, Highland Park, Irving, and Sunnyvale, greater than 90% of residents 18 years of age and older have received at least one dose of COVID-19 vaccine. In the cities of Cedar Hill, Desoto, Farmers Branch, Garland, Lancaster, and University Park, greater than 80% of residents 18 years of age and older have received at least one dose of COVID-19 vaccine. (*See below*).

About 60.7% of COVID-19 cases diagnosed in Week 4 were Dallas County residents who were not fully vaccinated. In Dallas County, 29,615 cases of COVID-19 breakthrough COVID-19 infections in fully vaccinated individuals have been confirmed to date, of which 2,689 (9.1%) were hospitalized and 429 have died due to COVID-19.

Of all Dallas County residents tested for COVID-19 by PCR during the week ending 1/29/2022 (CDC week 4), **29.6%** of respiratory specimens tested positive for SARS-CoV-2. For week 4, area hospital labs have continued to report elevated numbers and proportions of respiratory specimens that are positive for other respiratory viruses by molecular tests: parainfluenza (2.61%), rhinovirus/enterovirus (20.64%) and RSV (1.98%).

There are currently 91 active long-term care facility outbreaks. A cumulative total of 6,007 residents and 4,072 healthcare workers in long-term facilities in Dallas have been diagnosed with COVID-19. Of these, 1,258 have been hospitalized and 868 have died. About 16% of all deaths reported to date have been associated with long-term care facilities.

There have been 12 outbreaks of COVID-19 in a congregate-living facility (e.g. homeless shelters, group homes, and halfway homes) reported within the past 30 days. A cumulative total of 844 residents and 295 staff members in congregate-living facilities in Dallas have been diagnosed with COVID-19.

New cases are being reported as a daily aggregate, with more detailed data dashboards and summary reports updated on Friday evenings, available at: <https://www.dallascounty.org/departments/dchhs/2019-novel-coronavirus/daily-updates.php>.

Local health experts use hospitalizations, ICU admissions, and ER visits as three of the key indicators as part of determining the COVID-19 Risk Level (color-coded risk) and corresponding guidelines for activities during our COVID-19 response. The most recent COVID-19 hospitalization data for Dallas County, as reported to the North Central Texas Trauma Regional Advisory Council, can be found at www.dallascounty.org/covid-19 under “Monitoring Data,” and is updated regularly. This data includes information on the total available ICU beds, suspected and confirmed COVID-19 ER visits in the last 24 hours, confirmed COVID-19 inpatients, and COVID-19 deaths by actual date of death. The most recent forecasting from UTSW can be found [here](#).

Dallas County Residents Vaccinated for COVID-19 by City: as of Week Ending 1/22/2022 (MMWR Week 3)

¹Does not include vaccinated persons who reside in portions of these cities which are not within Dallas County.

²U.S. Census 2019 estimates of populations of city residents 18 years and older, inclusive of portions of cities located outside of Dallas County.

³Not Available (N/A): vaccine coverage not calculated for cities in which >20% of the city population resides outside of Dallas County.

⁴Fully vaccinated = persons who have received 2 doses of mRNA vaccines or 1 dose of Johnson & Johnson COVID-19 vaccine.

⁵Includes only residents with Dallas County--does not include persons who reside in portions of these cities which are not within Dallas County.

“Today America marked the grim milestone of 900,000 dead from COVID, 5,801 of them residents of Dallas County. For those who have not had their booster, it is incredibly important that you have your boosters. A new study shows that a person who is unvaccinated is 97 times more likely to die from COVID than someone who is vaccinated and boosted. Don't believe the hype. Please get vaccinated and boosted. The virus doesn't care about your political opinions or what websites and television programs you watch; it is relentlessly looking for a host to infect and vaccination is the best way to protect you, your family, and your community from complications due to COVID. With the cold weather, we will see a re-freezing of the roads and could see even slicker and more treacherous roads than we've seen before. If you don't need to be on the roadways, please stay off; leave those roadways to our first responders who will respond to emergencies caused by people who don't take the advice to stay off the road, and those who are required to travel during this treacherous time,” said Dallas County Judge Clay Jenkins.

- [Dallas County Guidance for Individuals at High-Risk for Severe COVID-19](#)

The Centers for Disease Control and Prevention (CDC) recommends taking everyday preventive actions to help prevent the spread of respiratory diseases, including:

- If you're unvaccinated, avoid close contact outside your home and put 6 feet of distance between yourself and people who don't live in your household.
- Cover your mouth and nose with a cloth face cover when around others and continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.
- Stay home when you are sick, except to seek medical care
- Wash your hands often and with soap and water for at least 20 seconds and help young children to do the same. If soap and water are not available, use an alcohol-base hand sanitizer with at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Clean and disinfect frequently touched objects and surfaces daily using a regular household cleaning spray or wipes.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you do not have a tissue, use your sleeve, not your hands. Immediately wash your hands.
- Monitor your health daily. Be alert for symptoms. Take your temperature and follow CDC guidance if symptoms develop.
- CDC recommends that anyone with any signs or symptoms of COVID-19 get tested, regardless of vaccination status or prior infection.
- If you get tested because you have symptoms or were potentially exposed to the virus, you should stay away from others pending test results and follow the advice of your health care provider or a public health professional.
