

FOR IMMEDIATE RELEASE

March 28, 2022

Dallas County Reports a Total of 524 New Positive 2019 Novel Coronavirus (COVID-19) Cases and 17 Deaths, Including 190 Probable Cases and 55 New Cases within 14 days of Specimen Collection Date

DALLAS -- As of 12:00 pm March 28, 2022 Dallas County Health and Human Services is reporting 524 additional positive cases of 2019 novel coronavirus (COVID-19) in Dallas County, 334 confirmed cases and 190 probable cases. There is a cumulative total of 475,578 confirmed cases (PCR test). There is a cumulative total of 102,650 probable cases (antigen test). Today's report includes 55 newly reported cases of COVID-19 within 14 days of specimen collection date. A total of 6,234 Dallas County residents have lost their lives due to COVID-19 illness. Today's press release includes the new case totals accumulated from Friday. Tomorrow's press release will include the numbers of new cases from Saturday, Sunday and Monday.

Dallas County Health and Human Services (DCHHS) provided more than 500,000 total doses of COVID-19 vaccine at the Fair Park mega-vaccine clinic, which operated January 11 through July 17. A vaccination clinic is open at the Dallas College Eastfield Campus Location on Saturdays from 9am-6pm. This week a pop-up vaccination clinic will also take place at Fair Park on Tuesday 12:30pm-6pm. A weekly pop-up vaccination clinic will also take place at Ellis Davis Fieldhouse on Tuesdays through Saturdays from 10am-6pm.

The additional deaths being reported today include the following:

- A man in his 40's who was a resident of the City of Dallas. He expired in an area hospital ED and had underlying high risk health conditions.
- A man in his 40's who was a resident of the City of Cedar Hill. He had been hospitalized and had underlying high risk health conditions.
- A man in his 50's who was a resident of the City of Balch Springs. He was found deceased at home and had underlying high risk health conditions.
- A woman in her 50's who was a resident of the City of Irving. She had been hospitalized and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Dallas. She was found deceased at home and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Garland. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Irving. He was found deceased at home and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Irving. She had been hospitalized and had underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Garland. He had been hospitalized and had underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Grand Prairie. He had been critically ill in an area hospital and did not have underlying high risk health conditions.

- A woman in her 60's who was a resident of the City of Dallas. She had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Dallas. He expired at home and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Dallas. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A woman in her 70's who was a resident of the City of Irving. She expired in hospice and had underlying high risk health conditions.
- A woman in her 80's who was a resident of the City of Dallas. She had been critically ill in an area hospital and did not have underlying high risk health conditions.
- A woman in her 80's who was a resident of the City of Richardson. She expired at home and had underlying high risk health conditions.
- A man in his 90's who was a resident of a long-term care facility in the City of Desoto. He was found deceased and had underlying high risk health conditions.

To date, a total of 2,056 cases with SARS-CoV-2 variants have been identified and investigated in residents of Dallas County, including: 162 cases of B.1.1.7 (Alpha); 4 cases of B.1.351 (Beta); 1,569 cases of B.1.617.2 (Delta); 14 cases of B.1.427 (Epsilon); 20 cases of P.1 (Gamma); 9 cases of B.1.526 (Iota); 4 cases of C.37 (Lambda); 2 cases of B.1.621 (Mu); 271 cases of B.1.1.529 (Omicron); and 1 case of P.2 (Zeta). Three hundred and fifty-four cases have been hospitalized and 49 have died. Thirty-five COVID-19 variant cases were reinfections. Five hundred and eighty-four people were considered fully vaccinated before infection with a COVID-19 variant.

As of 3/25/2022, a total of **350** confirmed and probable cases were reported in CDC week 11 (week ending 3/19/22), which is a weekly rate of **13.3** new cases per 100,000 residents.

As of the week ending 3/19/2022, about 81% of Dallas County residents age 12 years and older have received at least one dose of COVID-19 vaccine, including: 98% of residents age 65 years and older; 86% of residents between 40-64 years of age; 78% of residents 25-39 years of age; 67% of residents 18-24 years of age; and 62% of residents 12-17 years of age. In the cities of Addison, Coppell, Highland Park, Irving, and Sunnyvale, greater than 92% of residents 18 years of age and older have received at least one dose of COVID-19 vaccine. In the cities of Cedar Hill, Desoto, Farmers Branch, Garland, Lancaster, and University Park, greater than 80% of residents 18 years of age and older have received at least one dose of COVID-19 vaccine.

About 51.8% of COVID-19 cases diagnosed in Week 10 were Dallas County residents who were not fully vaccinated. In Dallas County, 41,310 cases of COVID-19 breakthrough COVID-19 infections in fully vaccinated individuals have been confirmed to date, of which 3,734 (9.0%) were hospitalized and 630 have died due to COVID-19.

Of all Dallas County residents tested for COVID-19 by PCR during the week ending 3/19/2022 (CDC week 11), **2.3%** of respiratory specimens tested positive for SARS-CoV-2. For week 11, area hospital labs have continued to report elevated numbers and proportions of respiratory specimens that are positive for other respiratory viruses by molecular tests: parainfluenza (3.73 %), rhinovirus/enterovirus (32.46%) and RSV (2.18%).

There are currently 19 active long-term care facility outbreaks. A cumulative total of 6,443 residents and 4,362 healthcare workers in long-term facilities in Dallas have been diagnosed with COVID-19. Of these, 1,326 have been hospitalized and 898 have died. About 16% of all deaths reported to date have been associated with long-term care facilities.

There have been 3 outbreaks of COVID-19 in a congregate-living facility (e.g. homeless shelters, group homes, and halfway homes) reported within the past 30 days. A cumulative total of 840 residents and 295 staff members in congregate-living facilities in Dallas have been diagnosed with COVID-19.

New cases are being reported as a daily aggregate, with more detailed data dashboards and summary reports updated on Friday evenings, available at: <https://www.dallascounty.org/departments/dchhs/2019-novel-coronavirus/daily-updates.php>.

Local health experts use hospitalizations, ICU admissions, and ER visits as three of the key indicators as part of determining the COVID-19 Risk Level (color-coded risk) and corresponding guidelines for activities during our COVID-19 response. The most recent COVID-19 hospitalization data for Dallas County, as reported to the North Central Texas Trauma Regional Advisory Council, can be found at www.dallascounty.org/covid-19 under “Monitoring Data,” and is updated regularly. This data includes information on the total available ICU beds, suspected and confirmed COVID-19 ER visits in the last 24 hours, confirmed COVID-19 inpatients, and COVID-19 deaths by actual date of death. The most recent forecasting from UTSW can be found [here](#). The most recent COVID-19 Data Summaries for Dallas County, TX can be found at the bottom of [this page](#).

“Today's numbers are 524 new cases reported and 17 deaths. However, only 55 of those cases that are being reported today were taken in the last 14 days. There is a large backlog with healthcare providers still from Omicron surge. But what we are seeing as we dig into those numbers were the ones that were reported in the last 14 days were staying in a range similar to today's 55. This is more good news and shows that currently transmission is lower than we've experienced in many months period. Although the risk is lower than it has been, it is still not zero. Please get vaccinated if you have not already, and please get your booster, if you are currently eligible for a booster. You can find vaccines near you at vaccines.gov,” said Dallas County Judge Clay Jenkins.
