Dallas County Reports a Total of 435 Newly Reported Cases of COVID-19 within 14 Days of Specimen Collection Date and 4 Deaths

DALLAS -- Dallas County Health and Human Services (DCHHS) is continuing to update and upgrade the data collection system. Cumulative case counts are being updated and will be reported at a later time. DCHHS is reporting **435** newly reported cases of COVID-19 within 14 days of specimen collection date. A total of 6,441 Dallas County residents have lost their lives due to COVID-19 illness.

The additional deaths being reported today include the following:

- A man in his 60's who was a resident of a long-term care facility in the City of Carrollton. He expired in hospice and had underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Garland. He had been critically ill in an area hospital and had underlying high risk health conditions.
- A man in his 70's who was a resident of the City of Dallas. He expired at home and had underlying high risk health conditions.
- A woman in her 90's who was a resident of a long-term care facility in the City of Irving. She expired in hospice and had underlying high risk health conditions.

To date, a total of 2,629 cases with SARS-CoV-2 variants have been identified and investigated in residents of Dallas County, including: 288 cases of B.1.1.7 (Alpha); 4 cases of B.1.351 (Beta); 1,870 cases of B.1.617.2 (Delta); 31 cases of B.1.427 (Epsilon); 29 cases of P.1 (Gamma); 15 cases of B.1.526 (Iota); 5 cases of C.37 (Lambda); 4 cases of B.1.621 (Mu); 380 cases of B.1.1.529 (Omicron); and 3 cases of P.2 (Zeta). Four hundred and forty-six cases have been hospitalized and 65 have died. Fifty-one COVID-19 variant cases were reinfections. Seven hundred and sixty-three people were considered fully vaccinated before infection with a COVID-19 variant.

For week 18, area hospital labs have continued to report elevated numbers and proportions of respiratory specimens that are positive for other respiratory viruses by molecular tests: parainfluenza (13.76%), rhinovirus/enterovirus (39.08%), and RSV (5.13%).

There are currently 17 active long-term care facility outbreaks. A cumulative total of 6,505 residents and 4,367 healthcare workers in long-term facilities in Dallas have been diagnosed with COVID-19. Of these, 1,340 have been hospitalized and 913 have died. About 16% of all deaths reported to date have been associated with long-term care facilities.

There have been 0 outbreaks of COVID-19 in a congregate-living facility (e.g. homeless shelters, group homes, and halfway homes) reported within the past 30 days. A cumulative total of 1,152 residents and staff members (856 residents and 296 staff) in congregate-living facilities in Dallas have been diagnosed with COVID-19.

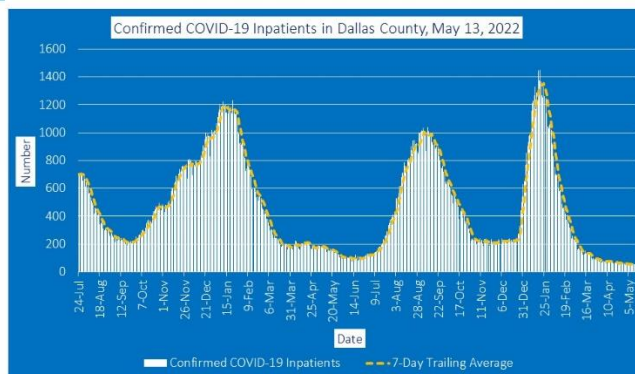

New cases are being reported as a daily aggregate, with more detailed data dashboards and summary reports updated on Friday evenings, available at: <https://www.dallascounty.org/departments/dchhs/2019-novel-coronavirus/daily-updates.php>.

“The numbers are inching up everywhere. And here is no exception. There were 435 cases reported in the last 14 days of specimen collection. Choosing safer activities like dining outside when the weather is pleasant and making sure you not only got your vaccine, but you've had at least one booster are smart ways to protect yourself From COVID-19. We want this to be a fun summer full of freedom, health, and activities for everyone. If you haven't been vaccinated or need your booster, please go to covid.gov to find a free shot near you,” said Dallas County Judge Clay Jenkins.
