

## FY2025 DCCSCD Interlock and Alcohol Monitoring: Directions

As part of DCCSCD's efforts to ensure quality and effective alcohol monitoring options for clients under community supervision, DCCSCD maintains a list of service providers who have agreed to uphold state and departmental standards in consideration of referrals by DCCSCD officers. This process applies exclusively to client-paid services and DCCSCD in no way guarantees payment or any assistance in collecting payment from any individuals who have been referred through this process. All DCCSCD officers must make referrals to ignition interlock (IID), portable breath alcohol monitoring (PAM), and transdermal alcohol monitoring (TAM) providers with whom the department has written agreements.

Dallas County CSCD will begin accepting applications for ignition interlock and alcohol monitoring services beginning Oct. 15th, 2023, at 8 a.m., c.s.t.

All providers, current and prospective, will need to apply for referral listing eligibility in FY2025.

All of the DCCSCD forms can be found at [dallascounty.org/department/community-supervision-and-corrections/provider-services/interlock-alcohol-monitoring-forms](https://dallascounty.org/department/community-supervision-and-corrections/provider-services/interlock-alcohol-monitoring-forms).

**Currently listed providers** will need to update their referral information and eligibility by returning a completed application along with the requested documentation to [Sofia.Kamal@dallascounty.org](mailto:Sofia.Kamal@dallascounty.org). Applications from currently listed providers will be reviewed and, if complete, will result in an update in listed referral information. Incomplete applications will be rejected. Currently listed providers WILL NOT need to participate in another PILOT TRAIL.

**Prospective providers** will need to

- 1) Return your completed application, signed MOUs, and all requested via email to [Sofia.Kamal@dallascounty.org](mailto:Sofia.Kamal@dallascounty.org).
- 2) Applications from prospective providers, if complete, will qualify the applicant to participate in a Pilot Trial. Pilot trials will be initiated by the department on a first come-first served basis once and approved applicant agency has recruited a minimum number of volunteer clients (15) who are supervised by DCCSCD. The pilot trial period will last approximately six months.
- 3) Service providers who meet the MOU standards throughout the pilot trial period will be listed for referral eligibility. Service providers who are not able to meet the MOU standards during the pilot trial will not be listed and will not be eligible to apply for another pilot trial for TWO (2) FULL YEARS after the conclusion of the pilot.
