**For Immediate Release: Dallas County DA's Office Working with DPD to Mitigate Issues
Caused by City of Dallas Ransomware Attack**

(DALLAS) – In light of the ransomware attack on Dallas City Government systems, the Dallas County Criminal District Attorney's Office is working together with the Dallas Police Department to ensure criminal cases continue to be filed and processed according to the law.

The DA's Office has worked collaboratively with Dallas Police to implement contingency measures to mitigate the impact of the ransomware attack. To ensure the continuity of justice, we have established alternative communication channels to facilitate seamless coordination and information sharing while maintaining the security and safety of the DA's Office's computer systems.

We understand that timeliness is crucial in maintaining public safety and public trust, and we remain resolute in our dedication to upholding the law and ensuring that cases are filed and prosecuted effectively.

We anticipate that the longer this goes on the greater chance for obligations on the DA's part will be affected.
