

Dallas County Health and Human Services 2019 Novel Coronavirus (COVID-19) Summary

July 17, 2020

- As of July 17, 2020, DCHHS is reporting 1,195 additional cases of 2019 novel coronavirus (COVID-19), bringing the total case count in Dallas County to 39,191, including 514 deaths.
- An increasing proportion of COVID-19 cases are being diagnosed in young adults between 18 to 40 years of age, such that of all cases reported after June 1st, over half have been in this age group.
- The age-adjusted rates of confirmed COVID-19 cases in non-hospitalized patients have been highest among Hispanics (667.4 per 100,000), Asians (187.4 per 100,000) and Blacks (136.4 per 100,000). These rates have been higher than Whites (43.8 per 100,000). Over 60% of overall COVID-19 cases to date have been Hispanic.
- The percentage of respiratory specimens testing positive for SARS-CoV-2 remains high with 26.8% among symptomatic patients presenting to area hospitals in week 28.
- Of the 4,781 cases requiring hospitalization to date, nearly three-quarter (72%) have been under 65 years of age, and over half reported having a chronic health condition. Diabetes has been an underlying high-risk health condition reported in about a third of all hospitalized patients with COVID-19.
- Of cases requiring hospitalization who reported employment, over 80% have been critical infrastructure workers, with a broad range of affected occupational sectors, including: healthcare, transportation, food and agriculture, public works, finance, communications, clergy, first responders and other essential functions.
- Thirty percent (30%) of deaths have been associated with long-term care facilities.

Figure 1. Daily COVID-19 cases by date of test collection, Dallas County: March 10 – July 17, 2020 1-4

- 1. Data received as of 8:00 pm yesterday, for residents of Dallas County tested with known specimen collection dates. This does include delayed results from previous days. All data are preliminary and subject to change as cases continue to be investigated.
- 2. Data are incomplete for the most recent dates. Test results may be reported to DCHHS several days after the result. The reporting lag is calculated as time from specimen collection to receipt of test results. The average reporting lag is 5.2 days, with a range from 0 90 days.
- $3. \ \ The \ validity \ of \ results \ based \ on \ antibody \ tests \ is \ not \ yet \ known. \ This \ summary \ report \ includes \ only \ confirmed \ cases \ based \ on \ PCR \ test \ results.$
- 4. Bars are the number of positive PCR tests which were collected that day.
- 5. Rolling 7-day average is the average number of new confirmed COVID-19 cases collected 7 days prior to value.

Data sources: National Respiratory and Enteric Virus Surveillance System and an additional subset of hospitals voluntarily reporting surveillance data directly to DCHHS. Testing denominators include out-of-county patients and testing performed only through hospitals in Dallas County. (Does not include FEMA drive-thru clinics). Data are incomplete for the most recent dates.

Figure 7. SARS-CoV-2 novel coronavirus positive tests reported to DCHHS by hospital laboratories:

March 22 – July 11, 2020 (CDC Weeks 13-28)¹⁻²

- 1. Data received as of 8:00 pm yesterday. All data are preliminary and subject to change as cases continue to be received and investigated.
- 2. Data are incomplete for the most recent dates. Test results may be reported to DCHHS several days after the result.

Table 6. Transmission risk factors for cumulative confirmed COVID-19 cases, Dallas County

Exposure Risk Factor	Cases (N= 39,191)	% of Total Cases
International Travel	80	0.2%
Domestic Travel (Out-of-state)	198	0.5%
Cruise Ship Travel	13	0.0%

Figure 8. Confirmed COVID-19-associated deaths by week of death, Dallas County: March 2019 through week ending July 11, 2020 (CDC Week 28)*

^{*} Dallas County residents diagnosed with confirmed COVID-19 by PCR testing.

² Texas Department of Criminal Justice cases are under the jurisdiction of the Texas Department of State Health Services for investigation

³ Federal prison cases are under the jurisdiction of the federal government for investigation, but are now included in total County cases

⁴ Includes: household transmission and cases with no other exposure risk factors identified

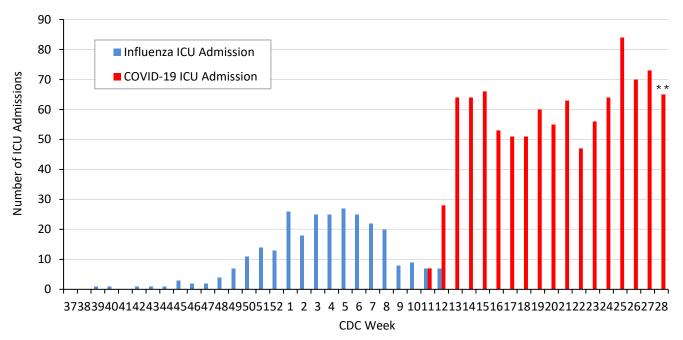

¹Reflects all COVID-19-associated hospitalizations and intensive care unit admissions reported from area hospitals within Dallas County by week of admission. Hospitalizations are inclusive of ICU admissions. Data are preliminary and include reports received as of 8:00 pm yesterday.

² Probable COVID-19 deaths as defined by CSTE interim case classification criteria--meeting vital records criteria without PCR laboratory confirmation.

³ Confirmed COVID-19 deaths as defined by a positive PCR test *and* any of the following: (1) death certificate denotation, (2) medical record documentation of compatible symptoms and clear progression from illness to death, or (3) determination by the County Medical Examiner's office (ME) of no alternate cause of death. Does not include possible COVID-19 -associated deaths with pending determination of cause of death.

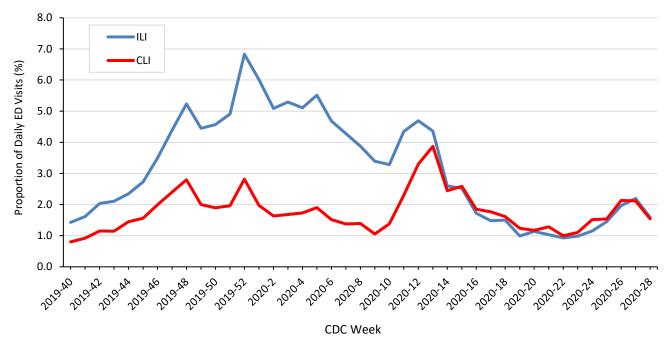

^{**} All data are preliminary and subject to change as cases continue to be received and investigated.

Figure 9. Intensive care unit hospitalizations for influenza and COVID-19 by week of admission, Dallas County: September 2019 through week ending July 11, 2020 (CDC Week 28)*

^{*} New ICU admissions of Dallas County residents reported with confirmed COVID-19 by PCR testing as of 8:00 pm yesterday. Hospitalized patients with self-reported residence from outside of Dallas County are not included.

Figure 10. Syndromic surveillance of emergency department visits for COVID-like illness (CLI)* and Influenza-like illness (ILI)**, Dallas County: September 29, 2019 – July 11, 2020

ESSENCE Data is from 18 hospital emergency departments voluntarily reporting numbers of persons presenting with self-reported chief complaints.

^{**} All data are preliminary and subject to change as cases continue to be received and investigated.

^{*} CLI is defined as chief complaint of fever and cough or shortness of breath or difficulty breathing.

^{**}ILI is defined as chief complaint of fever and cough or sore throat or mention of influenza.

CDC Priorities for COVID-19 Testing (rev. date: 5/3/20)

(See CDC Guidance for Evaluating and Reporting Persons Under Investigation (PUI) at:

https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html)

High Priority

- Hospitalized patients with symptoms
- Healthcare facility workers, workers in congregate living settings, and first responders with symptoms
- Residents in long-term care facilities or other congregate living settings, including prisons and shelters, with symptoms

Priority

- Persons with symptoms of potential COVID-19 infection, including: fever, cough, shortness
 of breath, chills, muscle pain, new loss of taste or smell, vomiting or diarrhea and/or sore
 throat.
- Persons without symptoms who are prioritized by health departments or clinicians, for any
 reason, including but not limited to: public health monitoring, sentinel surveillance, or
 screening of other asymptomatic individuals according to state and local plans.

Many Thanks to:

Our area hospitals and healthcare providers for reporting lab-confirmed COVID-19 cases

Our DCHHS Case and Contact Investigations Team volunteers from:

Dallas County Medical Society

UT Southwestern Medical School

Texas A&M College of Medicine

UTHealth School of Public Health

Retired School Nurses

New COVID-19 cases are reported as a daily aggregate, with this cumulative summary updated Tuesdays and Fridays.

DCHHS COVID-19 Summaries and Case Report Form are accessible at: https://www.dallascounty.org/departments/dchhs/2019-novel-coronavirus.php

DCHHS Acute Communicable Disease Epidemiology Division: COVID-19@dallascounty.org
