

Dallas County Health and Human Services 2019 Novel Coronavirus (COVID-19) Summary

September 18, 2020

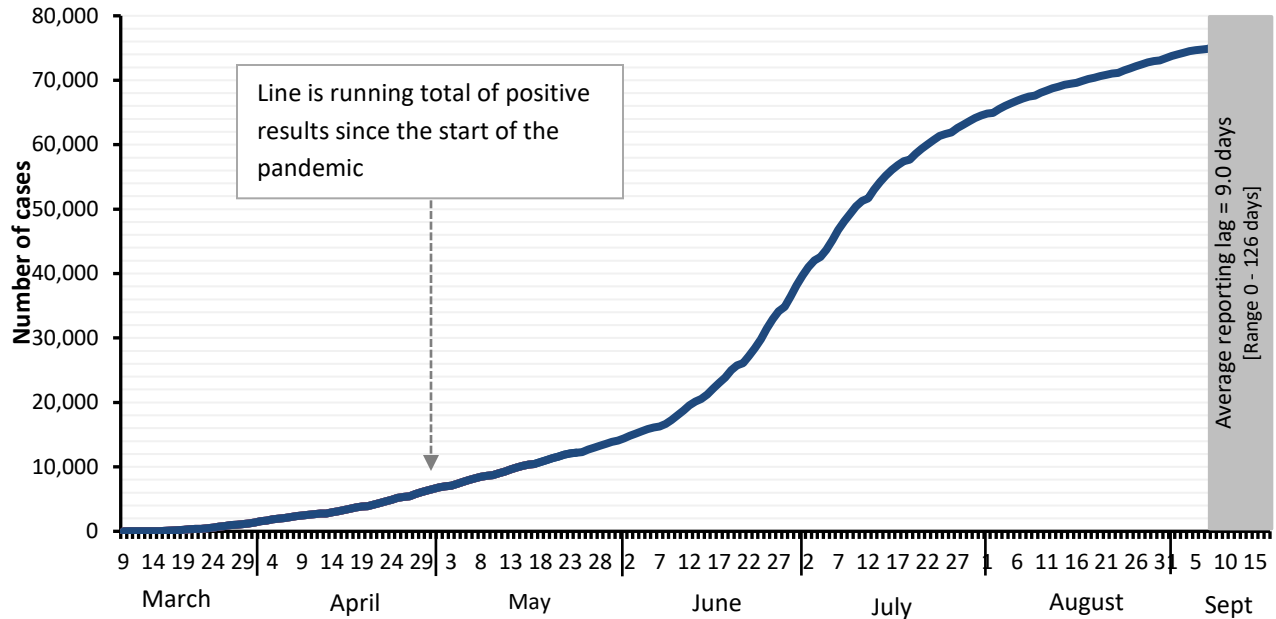

- As of September 18, 2020, DCHHS is reporting 355 additional confirmed cases of 2019 novel coronavirus (COVID-19), bringing the total number of confirmed cases in Dallas County to 76,962, including 990 confirmed deaths. The total number of probable cases in Dallas County is 3,774, including 11 probable COVID-19 associated deaths.
- The provisional 7-day average daily new confirmed and probable cases (by date of test collection) for CDC week 37 was 240. The percentage of respiratory specimens testing positive for SARS-CoV-2 remains high, with 10.0% of symptomatic patients presenting to area hospitals testing positive in week 37 (week ending 9/12/2020).
- The percentage of cases occurring in young adults aged 18 to 22 years has increased to 14% in September to date. A provisional total of 156 confirmed and probable COVID-19 cases were diagnosed in school-aged children (5 to 17 years) during CDC week 37, an increase from the previous week for this age group.
- Of the 7,673 cases requiring hospitalization to date, almost three-quarters (70%) have been under 65 years of age, and over half reported having a chronic health condition. Diabetes has been an underlying high-risk health condition reported in about a third of all hospitalized patients with COVID-19.
- Of cases requiring hospitalization who reported employment, almost 80% have been critical infrastructure workers, with a broad range of affected occupational sectors, including: healthcare, transportation, food and agriculture, public works, finance, communications, clergy, first responders and other essential functions.
- Twenty-five percent (25%) of deaths have been associated with long-term care facilities.

Figure 1. Confirmed COVID-19 positive cases by date of test collection, Dallas County: March 10 – September 18, 2020

1. Data received as of 8:00 pm yesterday, for residents of Dallas County tested with known specimen collection dates. This does include delayed results from previous days. All data are preliminary and subject to change as cases continue to be investigated.
2. Data are incomplete for the most recent dates. Test results may be reported to DCHHS several days after the result. The reporting lag is calculated as time from specimen collection to receipt of test results. The average reporting lag is 9.0 days, with a range from 0 – 126 days.
3. This summary graph includes only confirmed cases based on molecular amplification detection test results.
4. Bars are the number of positive molecular amplification detection tests which were collected that day.
5. Rolling 7-day average is the average number of new confirmed COVID-19 cases collected 7 days prior to value.

Figure 2. Cumulative confirmed COVID-19 cases by date of test collection, Dallas County: March 10 – September 18, 2020¹⁻²

1. Data received as of 8:00 pm yesterday, for residents of Dallas County tested with known specimen collection dates. This does include delayed results from previous days. All data are preliminary and subject to change as cases continue to be investigated.
2. Data are incomplete for the most recent dates. Test results may be reported to DCHHS several days after the result. The reporting lag is calculated as time from specimen collection to receipt of test results. The average reporting lag is 9.0 days, with a range from 0 – 126 days.

Table 1. Source of laboratory testing for confirmed cases of COVID-19, Dallas County

Source of Laboratory Testing for Reported Positive Molecular Amplification Detection Tests	# Tests (N=76,962)	% of Total Cases
Commercial or Hospital Laboratory*	75,073	97%
Dallas LRN Laboratory	1,617	2%
Other Public Health Laboratory	272	<1%

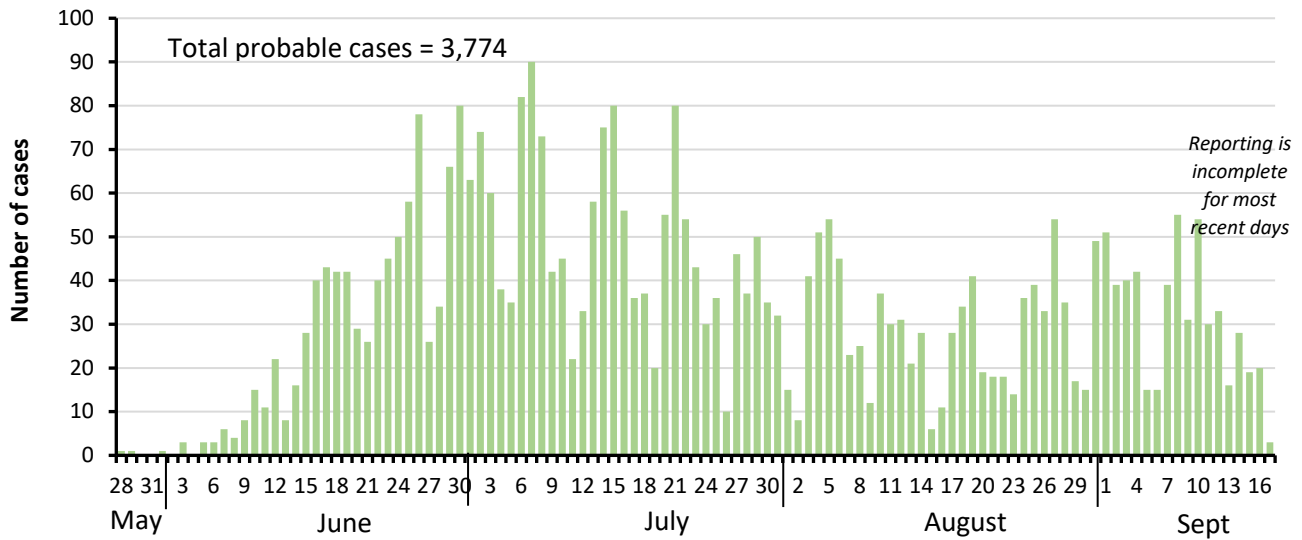

* Includes: AIT, ARUP, CPL, Excelsior, LabCorp, Magnolia, Medfusion, Prism, Quest, Viracor, and multiple hospital laboratories

Table 2. Characteristics of cumulative confirmed COVID-19 cases, Dallas County: March 9 – September 18, 2020

	Number	% of Total Cases*
Total Cases in Dallas County residents	N = 76,962	100%
Age Group (years)	0 to 17	11%
	18 to 40	46%
	41 to 64	34%
	≥65	9%
Sex	Female	51%
	Male	49%
Not Hospitalized (Includes: Outpatient, urgent care, drive-through, ED)	69,289	90%
Ever Hospitalized	7,673	10%

* Percentages calculated among cases with known age/sex

Figure 3. Probable COVID-19 cases by date of test collection, Dallas County: May 28 – September 18, 2020¹⁻⁵

1. Data received as of 8:00 pm yesterday, for residents of Dallas County tested with known specimen collection dates. This does include delayed results from previous days. All data are preliminary and subject to change as cases continue to be investigated.
2. Data are incomplete for the most recent dates. Test results may be reported to DCHHS several days after the result. The reporting lag is calculated as time from specimen collection to receipt of test results.
3. This summary graph includes only probable cases which meet below CDC case definition. Probable cases are reported separately from confirmed cases.

Table 3. Characteristics of cumulative probable COVID-19 cases, Dallas County: May 28 – September 18, 2020

		Number	% of Total Cases*
Total Probable Cases in Dallas County residents		N = 3,774	100%
Age Group (years)	0 to 17	880	23%
	18 to 40	1,884	50%
	41 to 64	834	22%
	≥65	171	5%
Sex	Female	1,894	50%
	Male	1,869	50%

* Percentages calculated among cases with known age/sex

CDC Definition of a COVID-19 case:

"A COVID-19 case includes [confirmed and probable cases and deaths](#). This change was made to reflect an interim [COVID-19 position](#) statement issued by the Council of State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a [nationally notifiable disease](#)."

CDC Definition of a COVID-19 probable case:

"A [probable case or death](#) is defined as:

- A person meeting [clinical criteria](#) **AND** [epidemiologic evidence](#) with no confirmatory laboratory testing performed for COVID-19;
- A person meeting [presumptive laboratory evidence](#) **AND** either [clinical criteria](#) **OR** [epidemiologic evidence](#);
- A person meeting [vital records criteria](#) with no confirmatory laboratory testing performed for COVID-19."

Private Schools	12	17
Homeschool	0	0
Non-Dallas County ³	2	8
Unknown	5	0
Total	146	189

1. Data received as of 8:00 pm yesterday, for children ages 5 to 17 years of age residing in Dallas County and for adults employed in K-12 schools within Dallas County. These totals are updated weekly to include receipt of delayed test results. All data are preliminary and subject to change as cases continue to be investigated

2. Includes cases verified to be enrolled in the district and cases projected to be enrolled in the ISD by zip code of residence.

3. Individual who attends or works in a school in Dallas County, but does not reside in Dallas County

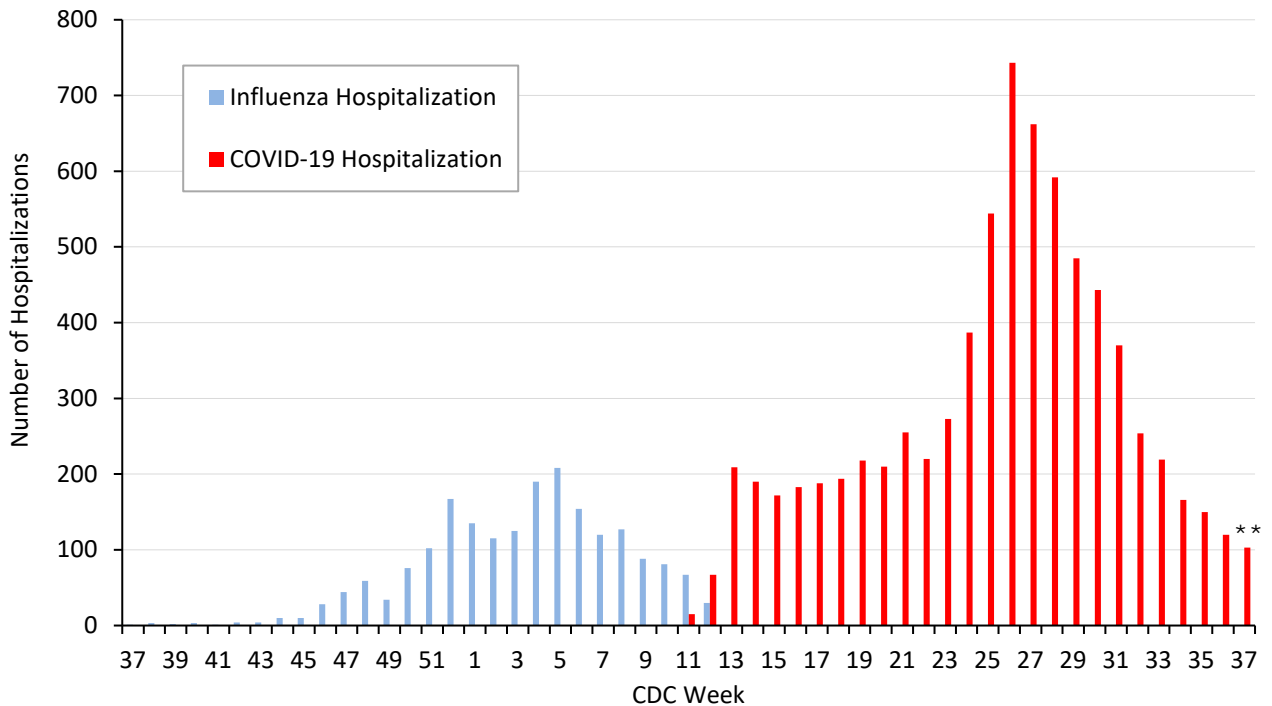

Figure 5. Non-hospitalized and hospitalized confirmed COVID-19 cases by week of test collection, Dallas County: September 2019 through week ending September 12, 2020 (CDC Week 37)*

* Non-hospitalized includes all patients not admitted to acute-care hospitals (e.g. outpatient, urgent care, drive-through, ED-only, LTCF) and diagnosed with confirmed COVID-19. All data are preliminary and subject to change as cases continue to be received and investigated.

** Data are incomplete for the most recent dates. Test results may be reported to DCHHS several days after the result. The reporting lag is calculated as time from specimen collection to receipt of molecular amplification detection test results.

Figure 6. Influenza and confirmed COVID-19 hospitalizations by week of admission, Dallas County: September 2019 through week ending September 12, 2020 (CDC Week 37)*

* Hospitalized Dallas County residents diagnosed with confirmed COVID-19 by molecular amplification detection testing. All data are preliminary and subject to change as cases continue to be received and investigated.

** Data are incomplete for the most recent dates. Test results may be reported to DCHHS several days after the result. The reporting lag is calculated as time from specimen collection to receipt of test results.

Table 4. Characteristics of cumulative hospitalized confirmed COVID-19 cases, Dallas County: March 10 – September 18, 2020

		Hospitalized Cases	%
<i>Ever Hospitalized</i>		N = 7,673	10% of Total Cases
Admitted to Intensive Care Unit		1,792	23%
Mechanical Ventilation		985	13%
Sex	Male	4,009	52%

Data sources: National Respiratory and Enteric Virus Surveillance System and an additional subset of hospitals voluntarily reporting surveillance PCR data directly to DCHHS. Testing denominators include out-of-county patients and testing performed only through hospitals in Dallas County. (Does not include FEMA drive-thru clinics). Data are incomplete for the most recent dates.

Figure 7. SARS-CoV-2 positive PCR tests reported to DCHHS by hospital laboratories: March 22 – September 12, 2020 (CDC Weeks 26-37)¹⁻²

1. Data received as of 8:00 pm yesterday. All data are preliminary and subject to change as cases continue to be received and investigated.
2. Data are incomplete for the most recent dates. Test results may be reported to DCHHS several days after the result.

Table 7. Transmission risk factors for cumulative confirmed COVID-19 cases, Dallas County

Exposure Risk Factor	Cases (N= 76,962)	% of Total Cases
International Travel	113	0.1%
Domestic Travel (Out-of-state)	300	0.4%
Cruise Ship Travel	14	<0.1%
Long-Term Care Facility (Resident) ¹	1,456	1.9%
County Jail (Inmate)	698	0.9%
State Jail (Inmate-- TDCJ COVID-19 Medical Action Center) ²	96	0.1%
Federal Prison (Inmate) ³	1,396	1.8%
Homeless Shelter	90	0.1%
Meat/Food Processing Facilities	591	0.8%
Close contact or Presumed Community Transmission ⁴	72,208	93.8%

¹ Does not include over 565 COVID-19 cases reported in LTCF staff members employed by the > 112 affected LTCFs.

² Texas Department of Criminal Justice cases are under the jurisdiction of the Texas Department of State Health Services for investigation

³ Federal prison cases are under the jurisdiction of the federal government for investigation, but are now included in total County cases

⁴ Includes: household transmission and cases with no other exposure risk factors identified

Table 8. Summary of weekly COVID-19 hospitalizations and deaths from Dallas County hospitals, Vital Statistics and Medical Examiner’s office¹⁻⁴

Week Ending	07/11	07/18	07/25	08/01	08/08	08/15	08/22	08/29	09/05	09/12	9/08/19– Present
CDC Week	28	29	30	31	32	33	34	35	36	37	
COVID-19 hospitalizations ¹	592	485	443	370	254	219	166	150	120	103	7,673*
COVID-19 ICU admissions ¹	149	119	89	100	62	52	33	23	13	13	1,792*
Probable COVID-19-associated deaths ²	0	0	3	2	3	3	0	0	0	0	11*
Confirmed COVID-19-associated deaths ³	58	78	103	79	58	56	39	34	16	2	990*

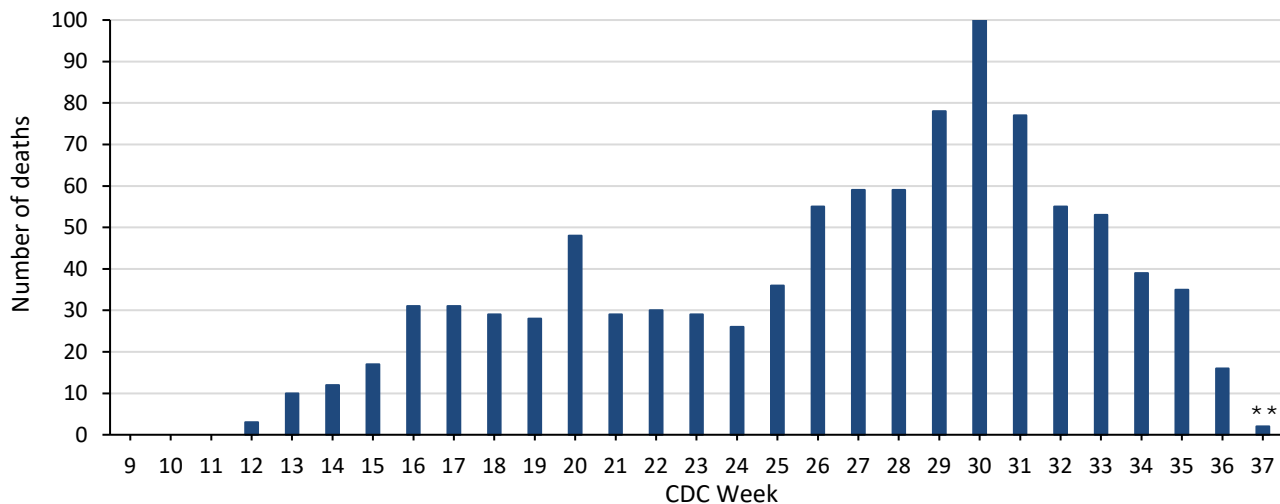

* All data are preliminary and subject to change as cases continue to be received and investigated.

¹ Reflects all COVID-19-associated hospitalizations and intensive care unit admissions reported from area hospitals within Dallas County by week of admission. Hospitalizations are inclusive of ICU admissions. Data are preliminary and include reports received as of 8:00 pm yesterday.

² Probable COVID-19 deaths as defined by CSTE interim case classification criteria--meeting vital records criteria without molecular lab test confirmation.

³ Confirmed COVID-19 deaths as defined by a positive molecular amplification detection test *and* any of the following: (1) death certificate denotation, (2) medical record documentation of compatible symptoms and clear progression from illness to death, or (3) determination by the County Medical Examiner’s office (ME) of no alternate cause of death. Does not include possible COVID-19 -associated deaths with pending determination of cause of death.

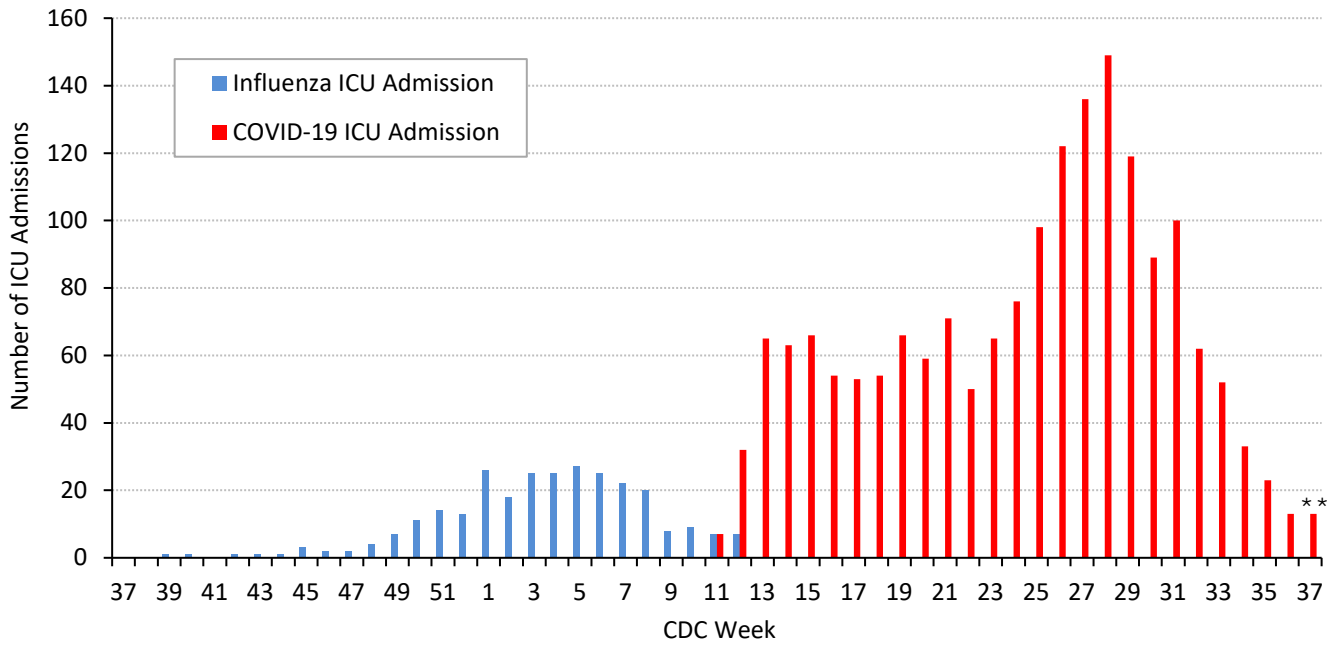

Figure 8. Confirmed COVID-19-associated deaths by week of death, Dallas County: March 2019 through week ending September 7, 2020 (CDC Week 37)*

* Dallas County residents diagnosed with confirmed COVID-19 by molecular amplification detection testing.

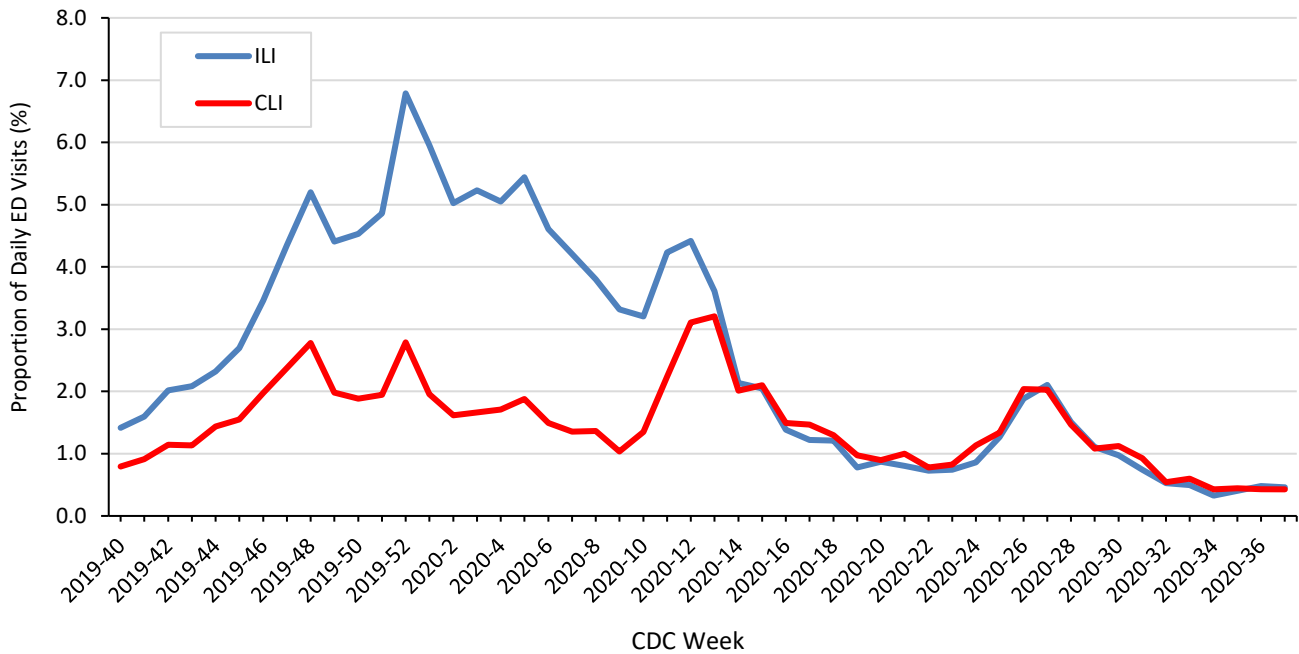

** All data are preliminary and subject to change as cases continue to be received and investigated.

Figure 9. Intensive care unit hospitalizations for influenza and COVID-19 by week of admission, Dallas County: September 2019 through week ending September 12, 2020 (CDC Week 37)*

* New ICU admissions of Dallas County residents reported with confirmed COVID-19 by molecular amplification detection testing as of 8:00 pm yesterday. Hospitalized patients with self-reported residence from outside of Dallas County are not included.
 ** All data are preliminary and subject to change as cases continue to be received and investigated.

Figure 10. Syndromic surveillance of emergency department visits for COVID-like illness (CLI)* and Influenza-like illness (ILI), Dallas County: September 29, 2019 – September 12, 2020**

ESSENCE Data is from 18 hospital emergency departments voluntarily reporting numbers of persons presenting with self-reported chief complaints.
 * CLI is defined as chief complaint of fever and cough or shortness of breath or difficulty breathing.
 **ILI is defined as chief complaint of fever and cough or sore throat or mention of influenza.

Table 9. Occupations of hospitalized patients with confirmed COVID-19, Dallas County, 3/10 – 8/17/20

Occupation	Hospitalized Cases (%) of Total Employed	
	Position	Sector
Critical Infrastructure Workers*		1,406 (78%)
Healthcare and Public Health		216 (12%)
	<i>Nurse, LVN, CNA</i>	36
	<i>Physician</i>	10
	<i>Other: Dentist, dietary, home health, medical assistant, mental health, PCT</i>	170
Transportation and Logistics		177 (10%)
	<i>Airline/Airport</i>	14

Many Thanks to:

Our area hospitals and healthcare providers for reporting lab-confirmed COVID-19 cases

Our DCHHS Case and Contact Investigations Team volunteers from:

Dallas County Medical Society

UT Southwestern Medical School

Texas A&M College of Medicine

UTHealth School of Public Health

Retired School Nurses

New COVID-19 cases are reported as a daily aggregate, with this cumulative summary updated Tuesdays and Fridays.

DCHHS COVID-19 Summaries and Case Report Form are accessible at:
