Dallas County Health and Human Services Arbovirus Surveillance Report

Week 27 ending July 6, 2019

- In week 26, six mosquito traps tested positive for WNV. In week 27 to date, eight mosquito traps tested positive for WNV in zip codes: 75041, 75050, 75061, 75082, 75098, 75159, 75181, and 75230.
- No human WNV cases have been reported to date for 2019.
- In 2019, 3 travel-associated Dengue cases have been identified in Dallas County.
- Aedes albopictus and Aedes aegypti are currently circulating in the area.

[†]One mosquito trap with a pool containing only Culex restuans was positive for WNV in week 18, and is not included in VI calculations.

- a. All traps deployed in municipalities submitting data to DCHHS since January 1, 2019. Includes traps without mosquitoes, malfunctioning traps and traps with pending results
- b. Excludes traps without female Culex quinquefasciatus identified. Maximum of 50 female Culex quinquefasciatus per pool; more than 1 pool may be tested per trap
- c. PHL = Public health laboratory (DSHS, DCHHS) testing performed by viral culture or CDC RT-PCR protocol; IL = Testing from independent labs by alternate methods
- d. Average abundance of female Culex quinquefasciatus mosquitoes per trap night/week (excludes non-working traps)
- e. WNV Infection rates calculated using a Maximum Likelihood Estimation (MLE). Biggerstaff BJ. PooledInfRate, version 4.0; Microsoft Excel Add-In; CDC 2007
- f. The Vector Index (VI) reflects the MLE adjusted for Culex quinquefasciatus abundance. VI= $\sum_{l=specles} \overline{N}i\hat{P}i$, where N is the average number of Culex quinquefasciatus mosquitoes collected per trap night and \hat{P} is the estimated infection rate
- g. Human cases by week of report to health department. WNND = West Nile Neuroinvasive Disease; WNF = West Nile Fever
- h. All Biogents (BG) Sentinel traps deployed in municipalities submitting data to DCHHS since Week 13.
- i. Average abundance of Aedes albopictus and Aedes aegypti mosquitoes per night/trap in BG-Traps (excludes non-working traps)
- $j. \quad \text{Human CHKV cases by week of report to health department (AT: Autochthonous case; I: imported)}\\$
- k. Human Dengue cases by week of report to the health department
- I. Confirmed and probable human Zika cases by week of specimen collection date $% \left(1\right) =\left(1\right) \left(1\right) \left($
- m. Possible Zika Virus Infection Among Pregnant Women United States and Territories, May 2016, http://www.cdc.gov/mmwr/volumes/65/wr/mm6520e1.htm/

^{*}Data for most recent 2 weeks are preliminary, and reflect results reported as of 12:30 p.m. July 8, 2019.
