Dallas County Health and Human Services Arbovirus Surveillance Report

Week 30 ending July 27, 2019

- In week 29, one mosquito traps tested positive for WNV. In week 30 to date, two mosquito traps tested positive for WNV in zip codes 75044 and 75080.
- No human WNV cases have been reported to date for 2019.
- In 2019, 3 travel-associated Dengue cases have been identified in Dallas County.
- Aedes albopictus and Aedes aegypti are currently circulating in the area.

[†]One mosquito trap with a pool containing only *Culex restuans* was positive for WNV in week 18, and is not included in VI calculations.

*Data for most recent 2 weeks are preliminary, and reflect results reported as of 12:30 p.m. July 29, 2019.

- a. All traps deployed in municipalities submitting data to DCHHS since January 1, 2019. Includes traps without mosquitoes, malfunctioning traps and traps with pending results
- b. Excludes traps without female Culex quinquefasciatus identified. Maximum of 50 female Culex quinquefasciatus per pool; more than 1 pool may be tested per trap
- c. PHL = Public health laboratory (DSHS, DCHHS) testing performed by viral culture or CDC RT-PCR protocol; IL = Testing from independent labs by alternate methods
 d. Average abundance of female *Culex quinquefasciatus* mosquitoes per trap night/week (excludes non-working traps)

e. WNV Infection rates calculated using a Maximum Likelihood Estimation (MLE). Biggerstaff BJ. PooledInfRate, version 4.0; Microsoft Excel Add-In; CDC 2007

f. The Vector Index (VI) reflects the MLE adjusted for *Culex quinquefasciatus* abundance. VI= $\sum_{i=specles} \overline{N}iPi$, where N is the average number of *Culex quinquefasciatus* mosquitoes collected per trap night and \hat{P} is the estimated infection rate

g. Human cases by week of report to health department. WNND = West Nile Neuroinvasive Disease; WNF = West Nile Fever

h. All Biogents (BG) Sentinel traps deployed in municipalities submitting data to DCHHS since Week 13.

i. Average abundance of Aedes albopictus and Aedes aegypti mosquitoes per night/trap in BG-Traps (excludes non-working traps)

j. Human CHKV cases by week of report to health department (AT : Autochthonous case; I : imported)

k. Human Dengue cases by week of report to the health department
I. Confirmed and probable human Zika cases by week of specimen collection date

m. Possible Zika Virus Infection Among Pregnant Women — United States and Territories, May 2016, http://www.cdc.gov/mmwr/volumes/65/wr/mm6520e1.htm/
