# Dallas County Health and Human Services Arbovirus Surveillance Report

Week 39 ending September 28, 2019

- In week 38, zero mosquito traps tested positive for WNV. In week 39 to date, zero traps tested positive for WNV.
- No human WNV cases have been reported to date for 2019.
- In 2019, 6 travel-associated Dengue cases have been identified in Dallas County.
- One travel-associated case of Chikungunya has been reported in 2019.
- Aedes albopictus and Aedes aegypti are currently circulating in the area.

<sup>†</sup>One mosquito trap with a pool containing only *Culex restuans* was positive for WNV in week 18, and is not included in VI calculations.

- a. All traps deployed in municipalities submitting data to DCHHS since January 1, 2019. Includes traps without mosquitoes, malfunctioning traps and traps with pending results
- b. Excludes traps without female Culex quinquefasciatus identified. Maximum of 50 female Culex quinquefasciatus per pool; more than 1 pool may be tested per trap
- c. PHL = Public health laboratory (DSHS, DCHHS) testing performed by viral culture or CDC RT-PCR protocol; IL = Testing from independent labs by alternate methods
- d. Average abundance of female Culex quinquefasciatus mosquitoes per trap night/week (excludes non-working traps)
- e. WNV Infection rates calculated using a Maximum Likelihood Estimation (MLE). Biggerstaff BJ. PooledInfRate, version 4.0; Microsoft Excel Add-In; CDC 2007
- f. The Vector Index (VI) reflects the MLE adjusted for *Culex quinquefasciatus* abundance. VI=  $\sum_{i=species} \overline{N}i\widehat{P}i$ , where N is the average number of *Culex quinquefasciatus* mosquitoes collected per trap night and  $\widehat{P}$  is the estimated infection rate
- g. Human cases by week of report to health department. WNND = West Nile Neuroinvasive Disease; WNF = West Nile Fever
- h. All Biogents (BG) Sentinel traps deployed in municipalities submitting data to DCHHS since Week 13.
- i. Average abundance of Aedes albopictus and Aedes aegypti mosquitoes per night/trap in BG-Traps (excludes non-working traps)
- j. Human CHKV cases by week of report to health department (AT : Autochthonous case; I : imported)
- k. Human Dengue cases by week of report to the health department
- I. Confirmed and probable human Zika cases by week of specimen collection date
- m. Possible Zika Virus Infection Among Pregnant Women United States and Territories, May 2016, http://www.cdc.gov/mmwr/volumes/65/wr/mm6520e1.htm/

<sup>\*</sup>Data for most recent 2 weeks are preliminary, and reflect results reported as of 12:30 p.m. September 30, 2019.
