

# Dallas County Health and Human Services Arbovirus Surveillance Report

Week 37 ending September 16, 2023

- In week 37, zero mosquito traps tested positive for WNV. To date for 2023, a total of one hundred and ninety-four mosquito traps have tested positive for WNV.
- Nineteen human WNV cases have been reported to date for 2023 including 2 deaths.
- Five travel related Dengue cases have been reported.
- No Zika cases have been reported year to date in 2023 in Dallas County.
- *Aedes albopictus* and *Aedes aegypti* are currently circulating in the area.

\*Data for most recent 2 weeks are preliminary, and reflect results reported as of 12:30 p.m. September 18, 2023

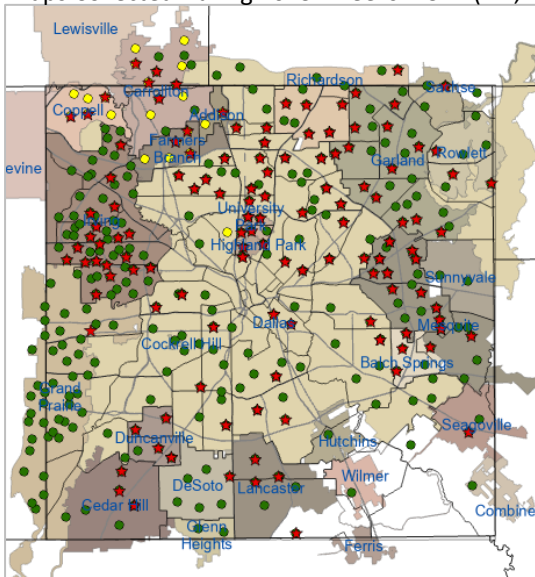

- All traps deployed in municipalities submitting data to DCHHS since January 1, 2023. Includes traps without mosquitoes, malfunctioning traps and traps with pending results
- Excludes traps without female *Culex quinquefasciatus* identified. Maximum of 50 female *Culex quinquefasciatus* per pool; more than 1 pool may be tested per trap
- PHL = Public health laboratory (DSHS, DCHHS) testing performed by viral culture or CDC RT-PCR protocol; IL = Testing from independent labs by alternate methods
- Average abundance of female *Culex quinquefasciatus* mosquitoes per trap night/week (excludes non-working traps)
- WNV Infection rates calculated using a Maximum Likelihood Estimation (MLE). *Biggerstaff BJ. PooledInfrate, version 4.0; Microsoft Excel Add-In; CDC 2007*
- The Vector Index (VI) reflects the MLE adjusted for *Culex quinquefasciatus* abundance.  $VI = \sum_{i=species} \bar{N} i \bar{P} i$ , where  $\bar{N}$  is the average number of *Culex quinquefasciatus* mosquitoes collected per trap night and  $\bar{P}$  is the estimated infection rate
- Human cases by week of report to health department. WNND = West Nile Neuroinvasive Disease; WNF = West Nile Fever
- All Biogents (BG) Sentinel traps deployed in municipalities submitting data to DCHHS since Week 14.
- Average abundance of *Aedes albopictus* and *Aedes aegypti* mosquitoes per night/trap in BG-Traps (excludes non-working traps)
- Human CHKV cases by week of report to health department (AT : Autochthonous case; I : imported)
- Human Dengue cases by week of report to the health department
- Confirmed and probable human Zika cases by week of specimen collection date
- Possible Zika Virus Infection Among Pregnant Women — United States and Territories, May 2016, <http://www.cdc.gov/mmwr/volumes/65/wr/mm6520e1.htm/>
