## Arbovirus Surveillance Report

Week 31 ending August 3, 2024

- In week 31, fifty-four mosquito traps tested positive for WNV. To date for 2024, a total of three hundred and seventy-four mosquito traps have tested positive for WNV.
- Six human WNV cases have been reported to date for 2024.
- Four travel related Dengue cases have been reported.
- No Zika cases have been reported year to date in 2024 in Dallas County.
- *Aedes albopictus* and *Aedes aegypti* are currently circulating in the area.

\*Data for most recent 2 weeks are preliminary, and reflect results reported as of 12:30 p.m. August 5, 2024

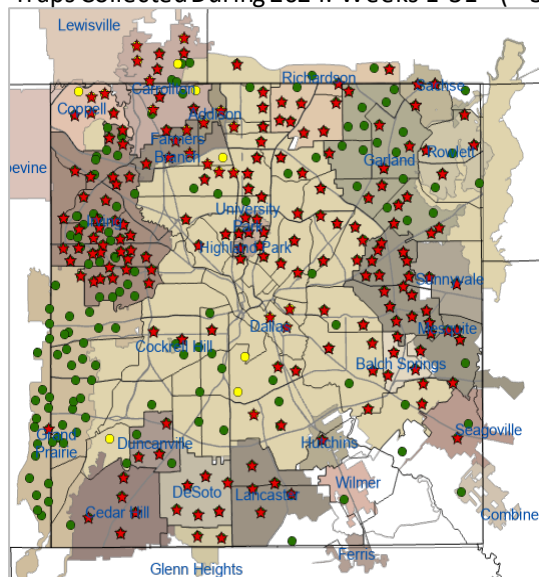

- All traps deployed in municipalities submitting data to DCHHS since January 1, 2023. Includes traps without mosquitoes, malfunctioning traps and traps with pending results
- Excludes traps without female *Culex quinquefasciatus* identified. Maximum of 50 female *Culex quinquefasciatus* per pool; more than 1 pool may be tested per trap
- PHL = Public health laboratory (DSHS, DCHHS) testing performed by viral culture or CDC RT-PCR protocol; IL = Testing from independent labs by alternate methods
- Average abundance of female *Culex quinquefasciatus* mosquitoes per trap night/week (excludes non-working traps)
- WNV Infection rates calculated using a Maximum Likelihood Estimation (MLE). *Biggeststaff BJ. PooledInfRate, version 4.0; Microsoft Excel Add-In; CDC 2007*
- The Vector Index (VI) reflects the MLE adjusted for *Culex quinquefasciatus* abundance.  $VI = \sum_{i=1}^N \bar{N}_i \bar{P}_i$ , where  $N$  is the average number of *Culex quinquefasciatus* mosquitoes collected per trap night and  $\bar{P}$  is the estimated infection rate
- Human cases by week of report to health department. WNND = West Nile Neuroinvasive Disease; WNF = West Nile Fever
- All Biogents (BG) Sentinel traps deployed in municipalities submitting data to DCHHS since Week 14.
- Average abundance of *Aedes albopictus* and *Aedes aegypti* mosquitoes per night/trap in BG-Traps (excludes non-working traps)
- Human CHIKV cases by week of report to health department (AT: Autochthonous case; I: imported)
- Human Dengue cases by week of report to the health department
- Confirmed and probable human Zika cases by week of specimen collection date
- Possible Zika Virus Infection Among Pregnant Women — United States and Territories, May 2016, <http://www.cdc.gov/mmwr/volumes/65/wr/mm6520e1.htm>
