N/A = Not applicable

- *Salmonella* causes the bacterial diarrheal illness salmonellosis and is one of the most frequent causes of foodborne infections in the U.S.
- Greater numbers of cases occur during the summer months in Dallas; infection rates are highest in infants and young children. Immunocompromised persons and elderly are also at higher risk for severe infections.
- The national Healthy People 2020 objective is to reduce the incidence of *salmonella* cases to 11.4 per 100,000 population.

Salmonellosis Cases and Incidence by Year of Onset, Dallas County, 1990-2015
