

Dallas County Health and Human Services 2021–2022 Influenza Surveillance Report

Week 12 ending March 26, 2022

Epidemiologic Summary

- Influenza activity remains high in Dallas County with 13.5 % of tests returning positive during week 12.
- Seventy-five Influenza-associated hospitalizations were reported during week 12.
- One influenza-associated death of an adult was reported in week 44. No influenza-associated pediatric deaths have been reported during the 2021-2022 season in Dallas County.
- RSV activity is low with 3.1% of tests from the surveillance site reported as positive.

Confirmed adult deaths ⁶	0	0	0	0	0	0	0	1
Possible influenza-associated deaths ⁷	0	0	0	0	0	0	0	0

⁴ Reflects all influenza-associated hospitalizations reported from 14 hospitals located within Dallas County by week of any positive influenza tests.

⁵ Confirmed influenza-associated deaths of Dallas County residents <18 years of age

⁶ Confirmed influenza-associated deaths as defined by a positive laboratory test and any of the following: (1) death certificate denotation, (2) medical record documentation of compatible symptoms and clear progression from illness to death, or (3) determination by the County Medical Examiner's office (ME) of no alternate cause of death. Deaths occurring outside of influenza season require a positive PCR result in order to meet laboratory criteria. Positive RIDT will meet laboratory criteria after the start of flu season.

⁷ Possible influenza-associated deaths are defined as cases with laboratory-confirmed influenza, but pending final autopsy results for determination of primary cause of death. Data updated as of March 26, 2022.

Please report any of the following patients to DCHHS within 1 working day:

- **Hospitalized patients with influenza** (any subtype). Confirmation can be by any laboratory test, rapid antigen, culture, PCR, DFA/IFA, or performed in an outpatient or inpatient laboratory.
- **Deaths of persons with confirmed influenza** (any subtype). We are requesting all pediatric influenza-associated deaths to be reported *immediately* to facilitate specimen procurement and testing.
- Suspected influenza infections involving institutional outbreaks or a resident of any **Long Term Care facility** (please report *immediately*).
