FOR IMMEDIATE RELEASE

DCHHS confirms mosquito samples test positive for West Nile virus

Ground Spraying Scheduled in Balch Springs

DALLAS (June 16, 2020) – Dallas County Health and Human Services' (DCHHS) laboratory confirmed mosquito samples have tested positive for West Nile virus. The mosquito traps were collected from the 75180 zip code of Balch Springs.

In conjunction with the Dallas County municipalities, mosquito abatement teams are responding by treating impacted areas. DCHHS has scheduled ground spraying in the below area(s), weather permitting:

Balch Springs

Tuesday, June 16th, 9:00 pm to 5:00 am

Wednesday, June 17th, 9:00 pm to 5:00 am

Residents should remain inside during the time sprayers are in the area. Spraying will not be conducted in the event of wind speeds more than 10 mph or inclement weather. A detailed map of the spray area can be viewed at <http://www.dallas.leateamapps.com/PublicMap/>

“Right now, even though we still need to be concentrating on how to live safely with COVID-19, we cannot forget about West Nile Virus. As the summer heats up and more people are getting outside, remember the four Ds: Dress, Drain, Dusk/Dawn, and DEET”, said Dr. Philip Huang, Director of DCHHS.

Residents should use the 4Ds to reduce exposure to mosquitoes:

- **DEET All day, Every day:** Whenever outside, use insect repellents that have the active ingredient DEET or other EPA-registered repellents and always follow label instructions.
- **Dress:** Wear long, loose, and light-colored clothing outside.
- **Drain:** Drain or treat all standing water in and around your home or workplace where mosquitoes could lay eggs.
- **All Day long:** Day, Dusk and Dawn -Limit your time outdoors mosquitos are active anytime day or night.
