TOTAL ALL OTHERS	235	277

In 2013, the following issues affected in how data was entered into and accessed from JCMS TechShare:

- Prior to April, the total number of referrals reported did not include paper referrals that had not yet been formalized with a JCMS referral date.
- Through November, many offenses now classified as Other Administrative referrals (e.g. referee orders, bench warrants, administrative holds, etc.) were also not given a JCMS referral date and were therefore not included in previous reports and statistical totals.

The numbers above reflect the changes that have since been implemented and as such, are an accounting of all referrals received by the Dallas County Juvenile Department in the years indicated.
