IF a LEVEL 2 PERMIT IS REQUIRED (\$100 ADDITIONAL FEE) The applicant must provide the following:

- Demonstration that the proposed development will result in ZERO increase in flood heights within the regulatory floodway of the 100-yr storm as established by the Flood Insurance Rate Maps for Dallas County.
- 2. Plans drawn to scale showing the nature, location, dimensions, and elevations of the area in question; existing or proposed structures, fill, storage of materials, drainage facilities, or any other landscape alterations.
- FEMA form 81-31, JUL 00 showing lowest floor elevations of all proposed structures to be one foot above
  the base flood elevation of the 100-yr storm as established by the Flood Insurance Rate Maps for Dallas
  County and referenced by the National Geodetic Vertical Datum of 1979 (NGVD).

4. Certification by a Professional Engineer, registered in the State of Texas, of any and all flood-proofing methods being used and or proposed.

5. All new construction and substantial improvements shall be properly anchored to prevent flotation, collapse, or lateral movement of the structure.

IF a LEVEL 3 PERMIT IS REQUIRED (S250 ADDITIONAL FEE). The applicant must provide the following:

- 1. Demonstration that the proposed development will result in ZERO increase in flood heights within the regulatory floodway of the 100-yr storm as established by the Flood Insurance Rate Maps for Dallas County.
- 2. Plans drawn to scale showing the nature, location, dimensions, and elevations of the area in question; existing or proposed structures, fill, storage of materials, drainage facilities, or any other landscape alterations.
- 3. FEMA form 81-31, JUL 00 showing lowest floor elevations of all proposed structures to be one foot above the base flood elevation of the 100-yr storm as established by the Flood Insurance Rate Maps for Dallas County and referenced by the National Geodetic Vertical Datum of 1979 (NGVD).

4. Certification by a Professional Engineer, registered in the State of Texas, of any and all flood-proofing methods being used and or proposed.

- 5. All new construction and substantial improvements shall be properly anchored to prevent flotation, collapse, or lateral movement of the structure.
- 6. Base flood elevation data must be shown for the entire property. This information may be obtained from FEMA if available. Otherwise a certified Professional Engineer licensed by the State of Texas must calculate them in a manner consistent with established FEMA regulations.
- 7. Show the location of all gas, water, and sewer services. Indicate how they will be constructed to withstand leakage or rupture during flooding. Electrical facilities shall be constructed at least one foot above the base flood elevation.
- 8. Show the location of all streets and building sites. Indicate how they will be constructed to provide adequate drainage and thereby minimize the damage due to floods.
