

# Skyline Trail

This map has been prepared courtesy of **VIRGINIA COOK, REALTORS.**

## DALLAS

General trail location shown in red above.

Befitting its name, the Skyline Trail offers cyclists, runners, and walkers spectacular views of the downtown Dallas skyline. But this City of Dallas-built trail also offers much, much more than just this. Consisting of two hard surface segments—a northern segment with 4.6 miles and a southern segment with 2.1 miles that are then connected by another 3.6 miles of soft surface trail—the Skyline Trail allows the public to travel along the Trinity River, under some of the area’s major bridges (including the Margaret Hunt Hill Bridge and the Margaret McDermott Bridge), and over what was once a Santa Fe railroad bridge.

The trail can be accessed at a number of points, but trailheads at the west end of the Continental Avenue Bridge, 1837 E. 8th Street, and the end of South Riverfront Blvd also feature paved parking.

This map is for informational purposes and only represents the approximate relative locations of the labeled features. This map was published in January 2016.

- █ Northern Segment
- █ Soft Surface
- █ Southern Segment
