Due to new Department of Energy  
transformer regulations that go in  
effect October 15, literature is not  
available at this time for the  
transformer. The transformer meets  
specifications required. Literature  
will be available before purchase.

We will do all the work in house.

We are proposing two separate panel  
boards for this project. One for the  
Main Split and one for the controlled  
split. This material from the  
manufacturer has a shorter lead time.  
The old split bus panels are no  
longer available and are not serviced  
any longer. We can offer a quicker  
lead time and installation time using  
these materials. We are proposing a  
Onan ATS so both the Generator  
and ATS will be serviced by the  
same manufacturer. Theae materials  
will result in a shorter outage.  
Cummins can provide a yearly  
maintenance agreement for  
\$2,000.00 if the County is interested.

All work for this project will be  
performed by our staff other than  
startup and training by manufacturer.
